## Paradigmatic Structure Of Person Marking:

**The Paradigmatic Structure of Person Marking** Michael Cysouw, 2003-07-03 This book investigates paradigms of person both independent pronouns as well as bound person marking Based on empirical and theoretical grounds the author argues that the notion number has to be redefined to deal with the cross linguistic variation of person marking Equipped with a new definition a typology of the paradigmatic structure of person marking is presented incorporating data from around 400 languages Nothing appears to be impossible for the paradigmatic structure although some patterns are clearly more probable than others are Starting from the more commonly occurring patterns the diachronic dynamics of paradigmatic structure are investigated by comparing close relatives that differ slightly in the structure of their person paradigms

**The Paradigmatic Structure of Person Marking** Michael Alexander Cysouw, 2001 The Paradigmatic Structure of Person Marking Michael Cysouw, 2009-01-29 This book explores person markers the linguistic elements that provide points of reference to speech act participants Michael Cysouw develops a new framework for the typology of person marking based on the rejection of the notion of plurality for its analysis When a mother says Mummy is going to say goodnight now Mummy is the person marker in a way that in English is confined to motherese but which is used more commonly in some other languages and may also be characteristic of much earlier forms Dr Cysouw divides the person markers of 400 languages into paradigms He considers how the structure of these person paradigms relates to their function His investigation provides a clear account of how person markers work syntactically pragmatically and semantically as well as giving fresh insights into aspects of linguistic change language relatedness and the interfaces between discourse syntax and semantics The combination of a typological and a comparative approach results in the first outline of a cognitive map of the paradigmatic structure of person marking

**Linguistics and Language Behavior Abstracts**, 2009 **Rivista Di Linguistica**, 2003 **Applicative Constructions** David A. Peterson, 2007 This book presents the first systematic typological analysis of applicatives across African American Indian and East Asian languages It is also the first to address their functions in discourse the derivation of their semantic and syntactic properties and how and why they have changed over time Applicative

constructions are typically described as transitivizing because they allow an intransitive base verb to have a direct object The term originates from the seventeenth century missionary grammars of Uto Aztec languages Constructions designated as prepositional benefactive and instrumental may refer to the same or similar phenomena Applicative constructions have been deployed in the development of a range of syntactic theories which have then often been used to explain their functions usually within the context of Bantu languages Dr Peterson provides a wealth of cross linguistic information on discourse functional diachronic and typological aspects of applicative constructions He documents their unexpected synchronic variety and the diversity of diachronic sources about them He argues that many standard assumptions about applicatives are unfounded and provides a clear guide for future language specific and cross linguistic research and analysis Phrasis, 2007 A scholarly journal devoted to the study of Dutch French English German Spanish Italian Latin ancient and new Greek and the Scandinavian language and literature
