Paradise For Sale A Parable Of Nature:

Paradise for Sale Carl N. McDaniel, John M. Gowdy, 2000-01-28 The grim history of Nauru Island a small speck in the Pacific Ocean halfway between Hawaii and Australia represents a larger story of environmental degradation and economic dysfunction For more than 2 000 years traditional Nauruans isolated from the rest of the world lived in social and ecological stability But in 1900 the discovery of phosphate an absolute requirement for agriculture catapulted Nauru into the world market Colonial imperialists who occupied Nauru and mined it for its lucrative phosphate resources devastated the island which forever changed its native people In 1968 Nauruans regained rule of their island and immediately faced a conundrum to pursue a sustainable future that would protect their truly valuable natural resources the biological and physical integrity of their island or to mine and sell the remaining forty year supply of phosphate and in the process make most of their home useless They did the latter In a captivating and moving style the authors describe how the island became one of the richest nations in the world and how its citizens acquired all the ills of modern life obesity diabetes heart disease hypertension At the same time Nauru became 80 percent mined out ruins that contain severely impoverished biological communities of little value in supporting human habitation This sad tale highlights the dire consequences of a free market economy a system in direct conflict with sustaining the environment In presenting evidence for the current mass extinction the authors argue that we cannot expect to preserve biodiversity or support sustainable habitation because our economic operating principles are incompatible with these activities

Ecology and Power in the Age of Empire Corey Ross, 2017-03-31 *Ecology and Power in the Age of Empire* provides the first wide ranging environmental history of the heyday of European imperialism from the late nineteenth century to the end of the colonial era It focuses on the ecological dimensions of the explosive growth of tropical commodity production global trade and modern resource management transformations that still visibly shape our world today and how they were related to broader social cultural and political developments in Europe s colonies Covering the overseas empires of all the major European powers Corey Ross argues that tropical environments were not merely a stage on which conquest and subjugation took place but were an essential part of the colonial project profoundly shaping the imperial enterprise even as they were shaped by it The story he tells is not only about the complexities of human experience but also about people s relationship with the ecosystems in which they were themselves embedded the soil water plants and animals that were likewise a part of Europe s empire Although it shows that imperial conquest rarely represented a sudden bout of ecological devastation it nonetheless demonstrates that modern imperialism marked a decisive and largely negative milestone for the natural environment By relating the expansion of modern empire global trade and mass consumption to the momentous ecological shifts that they entailed this book provides a historical perspective on the vital nexus of social political and environmental issues that we face in the twenty first century world

ECONOMICS INTERACTIONS WITH OTHER DISCIPLINES - Volume I John M. Gowdy, 2009-10-14 *Economics Interactions with Other Disciplines* is the component of

Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Economics Interactions with Other Disciplines reflects the new interdisciplinary approach of economists focusing on the issues of health and the environment The chapters range from standard applications of economic theory to more radical approaches These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs

Earth Day John McConnell, 2011-07-22 After a half century of activism John McConnell the true founder of Earth Day here relates his global promotion of peace justice and Earth care Following the Kennedy assassination McConnell's Minute for Peace gained worldwide attention This led to his Earth Day and other initiatives aimed at promoting people and planet In this book he shares the views that garnered support during the environmental movement from 1969 onward and that have inspired followers for forty years at annual Earth Day ceremonies at the UN and cities across the globe John McConnell coined the term Earth Day in 1968 proposed its celebration on the spring equinox to the City of San Francisco in October 1969 and announced it in November at a UNESCO Conference The City responded by hosting the first Earth Day on March 21 1970 Margaret Mead UN Secretary General U Thant President Ford and thirty three Nobel laureates supported McConnell's Earth Day and thirty six worldwide dignitaries signed McConnell's Earth Day Proclamation supporting Earth Day on the spring equinox an annual planetary holiday linking people everywhere without regard to politics culture national border or religion In 1957 after Sputnik McConnell promoted the Star of Hope a satellite devoted to peace This effort sparked his origination of Earth Day the Earth Flag Earth Trustees and the Earth Magna Charta He worked with UN officials and other leaders to overcome differences and build common ground for peace aiming to ensure our planet's future and human survival This book chronicles his global mission his life journey and his unique contributions toward a peaceful and cherished planet

The Ecologist, 2000 World Watch, 2000 **Life on Earth [2 volumes]** Niles Eldredge, 2002 An examination of nature's extraordinary biological diversity and the human activities that threaten it

Managing Human-dominated Ecosystems Victoria Catherine Hollowell, Missouri Botanical Garden, 2001 How do you place an economic value on biodiversity How does the trend toward high tech industries affect pressure on environmental resources at home and abroad How can we build an environmentally sustainable future that makes sense economically An international group of ecologists and economists gathered at the Missouri Botanical Garden in 1998 to discuss ecosystem services and the economy Examples are drawn from New York City's Catskill and Croton Watersheds Australian savannas Latin American cities and forests European industrial systems African river basins and more

Pacific Studies : a Journal Devoted to the Study of the Pacific-its Islands and Adjacent Countries, 2001 Secret Places Frank Stewart, Samrat Upadhyay, Manjushree Thapa, 2001 Prior to Nepal's constitutional reforms in 1990 poets and fiction writers were often jailed and censored for speaking out Nevertheless they developed ways to discuss social and political

issues in their creative works and to express the lives of Nepal's diverse peoples Nepali authors in *Secret Places* include Shailendra Sakar Majul Peter J Karthak Kesang Tseten and Manu Brajaki The volume also contains an informative interview with Mohan Koirala one of Nepal's most respected poets and Samrat's essay *A Kingdom Orphaned* about the effects of the massacre of the royal family on the country and its people

"Old Things" on the Loose Julia J. Hollowell, 2004

Turnaround Edward A. Myers, 2004 Ed Myers 1917-2002 was a remarkable man who focused his capacious mind and learning on the issue of the earth's future A realist with an engaging sense of humor he wrote dozens of articles letters sermons and diatribes on topics ranging from global climate change to the benefits of not smoking Running throughout all his writings was his belief that the earth's long term health could only be assured if we its inhabitants changed our behavior And he firmly believed we had the means and the will to do so Ed Myers saw the humor in almost everything that happened but he was deadly serious about saving the planet and turning it over to successive generations in better shape than he found it Nobody forgot Ed Myers or his message So we are presently engaged in a gigantic planetary chemical experiment to see how much CO₂ and its global effects we can stand When the experiment is complete there won't be anybody around to report on it The Creation in writer Annie Dillard's phrase will be playing to an empty house This dreary prospect does not have to happen At the end of the nineteenth century we made a choice or rather had it made for us We would run the world on fossil fuels It proved to be a very successful choice for a runaway industrial society and worked well in its own way for about a century But for the long term the choice was in a word lousy Now we have a chance to turn it around Our only chance Additional commentary and updates are provided by Peter Shelley Conservation Law Foundation Don Hudson Chewonki Foundation Tom Chappell Tom's of Maine Robin Alden and Melissa Waterman

Oceania Alfred Reginald Radcliffe-Brown, Raymond Firth, Adolphus Peter Elkin, 2001

A World of Islands Godfrey Baldacchino, 2007

Ecological Debt Andrew Simms, 2005 Imagine opening a bank letter at breakfast to find that instead of your normal overdraft you had an ecological debt that threatened the planet If the whole world wanted to live like people in the United Kingdom we would need the resources of three planets like Earth If the United States was our model the number would be five Simms shows how millions of us in the West are running up huge ecological debts from the amount of oil and coal that we burn to heat our houses and run our cars to what we consume and the waste that we create the impact of our lifestyles is felt worldwide Whilst these debts go unpaid millions more living in poverty in the majority world suffer the burden of paying dubious foreign financial debts The book explores a great paradox of our age how the global wealth gap was built on ecological debts which the world's poorest are now having to pay for Highlighting how and why this has happened he also shows what can be done differently in the future and what steps we can take to stop pushing the planet to the point of environmental bankruptcy

Pacific Collection Acquisitions List University of Hawaii at Manoa. Library.

Pacific Collection,1999 **Encyclopedia of the Peoples of Asia and Oceania** Barbara A. West,2009 Encyclopedia of the Peoples of Asia and Oceania is a new two volume A to Z reference to the peoples of the Asia Pacific region east of the Caspian Sea not including the countries of the Middle East More than 400 entries cover the major peoples that for a time maintained a cultural identity in the area from ancient to modern times describing their history migration culture belief system social organization and relationship to other peoples This accessible resource makes it easy for students to find not only entries on the Han and Jurchens but also on Chinese nationality describing who they are today with cross references to the various ancestral peoples Entries on all large or well known groups include information on their geography origins languages history and culture Subsections cover such topics as subsistence religion social and political structures economy government military practices dwellings and architecture clothing transportation technology art music and literature The back matter includes a chronology bibliography and comprehensive index as well as several appendixes with useful background information on topics such as kinship systems religious systems and subsistence systems On the Edge of Scarcity Michael N. Dobkowski,Isidor Wallimann,2002 These essays address one of the most pressing and significant issues that humanity has confronted to date the lack of life sustaining resources Michael N Dobkowski and Isidor Wallimann establish a disturbing but realistic scenario of the disastrous future that awaits humankind as surplus populations collide with dwindling resources Authors consider a number of cause and effect situations on industrialization biophysical limits exponential population growth and genocide to name a few This volume is a critical contribution to the field and will serve as an ideal introduction to courses in the environment population resources genocide and social conflict

The Enigmatic Realm of **Paradise For Sale A Parable Of Nature**: Unleashing the Language is Inner Magic
