*Stolen Fruit* Peter Robbins,2003-11-29 Fifty or more developing countries still depend mainly on the tropical commodities or minerals that they produce But encouraging so many countries to grow coffee sugar cotton and other crops has been a disaster Small farmers get only a tiny share of the final tag on these commodities on supermarket shelves in the North Prices have collapsed terms of trade between North and South have widened and foreign exchange earnings tax revenues and economic growth in developing countries have plummeted Peter Robbins examines how this situation came about the current trading arrangements and the possible ways forward He argues that if developing countries are to measure up to the scale of the disaster facing them they must take a leaf out of supply side economics and take the measures to bring supply and demand into a balance that will secure them far higher and more stable prices Revitalizing Democracy? Elin Royles,2007 Devolution or home rule is the transfer of power from a more centralized form of government to one that is of a local or regional nature This book length study examines the impact of the devolution from British rule on Welsh civil society during the Welsh Assembly s first term from 1999 to 2003 Comprehensive theoretical examination is paired with case based research in order to discuss the relationship between civil society democracy and national identity and to question whether civil society contributes to promoting a stronger sense of Welsh national identity essential reading for all those interested in contemporary Welsh politics *Making Poverty* Thomas Lines,2008-07-01 In this clear and intelligent book Thomas Lines examines the role that global policies have played in creating a crisis of rural poverty He explains the mechanisms of markets and supply chains charting their impact on agricultural trade in the world s poorest countries A desperate situation is emerging which could soon leave little place for hundreds of millions of smallholders across the world as the global supply

chains of giant food corporations and supermarkets swallow them up Poor countries have become newly vulnerable to price changes for crops like rice and wheat and the situation is set to deteriorate further if global policies do not change The author argues that debates about world trade negotiations have only highlighted part of the problem we must turn our attention to wider economic policies the workings of the markets themselves and the division of power along the supply chains to establish a practical set of solutions Combining analytical rigour with a clearly accessible examination of the key factors the author deftly points to the forms that these solutions could take *Fresh Cup* ,2003 *Ecoforum* ,2003
