**Environmental Management of the Media** Pietari Kääpä, 2018-05-23 In recent years the widely held misconception of the media as an ephemeral industry has been challenged by research on the industry's significant material footprint Despite this material turn no systematic study of this sector has been conducted in ways that considers the role of the media industries as consumers and users of a range of natural resources Filling this gap Environmental Management of the Media discusses the environmental management of the media industries in the UK and the Nordic countries These Nordic countries both as a set of small nations and as a regional constellation are frequently perceived as some of the greenest in the world yet not only is the footprint of the media industries practically ignored in academic research but the very real stakes of the industries global impact are not comprehensively understood Here the author focuses on four key areas for investigating the material impact of Nordic media 1 resources used for production and dissemination 2 regulation of the media 3 organizational management and 4 labour practices By adopting an interdisciplinary perspective that combines ecocritical analysis with interrogation of the political economy of the creative industries K p argues that taking the industries to task on their environmental footprint is a multilevel resource and organizational management issue that must be addressed more effectively in contemporary media studies This book will be of great interest to students and scholars of media communication and environmental studies *Environmental Management* ECOTEC Research and Consulting, 1989 **Best**
