The Futures of the Present: New Directions in (American) Literature Danuta Fjellestad, David Watson, 2018-04-19 It has become a critical commonplace that postmodernism no longer serves as an adequate designation for contemporary literature But what comes after postmodernism What are the tendencies and directions within contemporary American literature that promise to shape its future The contributions to this book are written in the shadows of new media a turn towards the nonhuman in critical thinking and a surge in environmental and apocalyptic thought Engaging with such contemporary debates the authors map the rapidly changing ecosystem of contemporary literary genres and forms and attend to transformations in the production reception and circulation of books This book takes for granted that American literature does have a future although whatever this future holds it is unlikely to be what we expect At this historical juncture the American novel seems to carve its future through an engagement with issues at the forefront of our present thereby ensuring its own ongoing contemporaneity This book was originally published as a special issue of *Studia Neophilologica*
