Lovelace V. Hall ,1989    The Web of Preaching Richard L. Eslinger,2002-08-01 Preaching is not as simple as it may appear The preacher today is confronted with a dizzying array of homiletic methods and approaches each holding important insights into how to proclaim the Good News While pastors wish to learn from these different ways of preaching they often do not know where to begin Who are the best representatives of a given approach How do the different methods relate to one another How has the preaching scene changed in recent years In The Web of Preaching Richard Eslinger addresses these and other questions about contemporary approaches to preaching Surveying the most important current theories of preaching he argues that no homiletic method can be understood on its own The different schools of thought on preaching all intersect at such common points as Scripture narrative and the role of preaching in worship A strength in one compensates for a weakness in another and seen together they form one comprehensive web of preaching This book is a follow up to Eslinger s earlier A New Hearing which has been a standard text in preaching courses since its publication in 1987

**The Middle-Class City** John Henry Hepp, IV,2018-06-29 The classic historical interpretation of the late nineteenth and early twentieth centuries in America sees this period as a political search for order by the middle class culminating in Progressive Era reforms In The Middle Class City John Hepp examines transformations in everyday middle class life in Philadelphia between 1876 and 1926 to discover the cultural roots of this search for order By looking at complex relationships among members of that city s middle class and three largely bourgeois commercial institutions newspapers department stores and railroads Hepp finds that the men and women of the middle class consistently reordered their world along rational lines According to Hepp this period was rife with evidence of creative reorganization that served to mold middle class life The department store was more than just an expanded dry goods emporium it was a middle class haven of order in the heart of a frenetic city an entirely new way of organizing merchandise for sale Redesigned newspapers brought well ordered news and entertainment to middle class homes and also carried retail advertisements to entice consumers downtown via train and streetcar The complex interiors of urban railroad stations reflected a rationalization of space and rail schedules embodied the modernized specialization of standard time In his fascinating investigation of similar patterns of behavior among commercial institutions Hepp exposes an important intersection between the histories of the city and the middle class In his careful reconstruction of this now vanished culture Hepp examines a wide variety of sources including diaries and memoirs left by middle class women and men of the region Following Philadelphians as they rode trains and trolleys read newspapers and shopped at department stores he uses their accounts as individualized guidebooks to middle class life in the metropolis And through a creative use of photographs floor plans maps and material culture The Middle Class City helps to reconstruct the physical settings of these enterprises and recreate everyday middle class life shedding new light on an underanalyzed historical group and the cultural history of twentieth century America    *The Transformation of an Ancient Egyptian*

*Narrative Anthony John Spalinger, 2002* This volume covers the alterations that were performed by Pentawaret the scribe of P Sallier III when he decided to copy the entire text of the Battle of Kadesh. The intellectual background to Pentawaret and his associates especially their political and literary milieu are covered.
