

## Structure and Function of the Human Body

Structure of the body- is how the body and its parts are arranged and organized

Function of the body - is the purpose of the various parts of the body and how they work

### Body Systems

A system is a group of organs working together to perform certain functions. (eg. the urinary system is made up of kidneys, ureters, bladder, urethra). The human body can be divided into ten systems:

| SYSTEM           | FUNCTION                                                                                                        | ORGANS                                                                                                                                                                                                                           |
