## Monster Solution:

**The Mind Monster Solution** Hazel Gale, 2019-05-30 We all do things that we wish we wouldn't. We overeat, underperform, procrastinate, push people away and say the wrong things at precisely the worst moments. What if we could find a way to overcome our self-destructive tendencies? Fight explains the psychology of self-sabotage and offers a practical guide to taking control. While training as a competitive boxer and kickboxer, Hazel Gale developed anxiety issues that led to emotional and physical burnout. Discovering cognitive hypnotherapy not only helped her back on the road to health but ultimately turned her whole life around. She learnt to understand competition, success, fear and challenge in new ways, leading to international titles across both sports. Hazel felt compelled to introduce others to the profound benefits of cognitive hypnotherapy. She trained as a therapist and is now one of the most sought-after practitioners in Britain. [The Sun](#) **Business Intelligence** Marie-Aude Aufaure, Esteban Zimányi, 2013-01-17 To large organizations, business intelligence (BI) promises the capability of collecting and analyzing internal and external data to generate knowledge and value, thus providing decision support at the strategic, tactical and operational levels. BI is now impacted by the Big Data phenomena and the evolution of society and users. In particular, BI applications must cope with additional heterogeneous, often Web-based sources, e.g. from social networks, blogs, competitors, suppliers or distributors, data governmental or NGO-based analysis and papers or from research publications. In addition, they must be able to provide their results also on mobile devices, taking into account location-based or time-based environmental data. The lectures held at the Second European Business Intelligence Summer School (eBISS) which are presented here in an extended and refined format cover not only established BI and BPM technologies but extend into innovative aspects that are important in this new environment and for novel applications, e.g. machine learning, logic networks, graph mining, business semantics, large-scale data management and analysis and multicriteria and collaborative decision making. Combining papers by leading researchers in the field, this volume equips the reader with the state-of-the-art background necessary for creating the future of BI. It also provides the reader with an excellent basis and many pointers for further research in this growing field.
