Environmental Assessment as a Tool for Climate Change Mitigation Benoit Mayer, 2024-11-15 Most governments have established procedures to appraise the environmental impacts of proposed activities The focus of these environmental assessment procedures has long been on local environmental issues such as air water and land pollution which have a direct and concrete effect on communities In recent years however these procedures have increasingly been used to consider how activities could result in the emission of greenhouse gases and exacerbate climate change Environmental Assessment as a Tool for Climate Change Mitigation builds on a broad survey of over one hundred national environmental assessment practices legislation guiding documents cases and administrative practice to reflect on the main conceptual and practical

issues facing climate assessment By presenting and discussing jurisdictional developments and national debates in a global comparative perspective this book aims to enrich our collective understanding of the modalities of and ultimately the mitigation opportunities arising from the use of climate assessment in relation to proposed activities The author concludes this timely and forward looking volume by identifying good practices that lawmakers regulators national agencies judges and lawyers should consider when developing and applying the law on climate assessment     **A Guide to the Montana**
