Studying Math Sidney Smith, Wendy Hageman Smith, 2005-08 Mathematics is an essential component for almost any educational or professional goal yet to many students it is also an obstacle and a source of deep seated frustration In Studying Math Pathways to Success we help students bring their math anxiety under control by identifying its root causes by revealing constructive ways to cope with frustration and by explaining the best techniques for studying college math successfully We examine tips for note taking homework and exams and demystify the college math curriculum so that students can better understand how studying math fits into their broader goals

Examination of High School Mathematics Pathways Judy J. Viney, 2016 With the advent of Common Core State Standards mathematics education in the United States has been experiencing a paradigm shift in the structure in which mathematics classes are organized This study explored the difference between the traditional United States pathway of Algebra 1 Geometry and Algebra 2 versus the international pathway Integrated Mathematics 1 Integrated Mathematics 2 and Integrated Mathematics 3 Specifically this study investigated if there was a difference in academic achievement between the two pathways This study examined students in five sections of Algebra 1 in the 2013 2014 school year and seven sections of Integrated Mathematics 1 in the 2014 2015 school year Although there were multiple teachers these classes were all taught at the same level and each subject used the same curriculum This study used the seventh grade California Standards Test CST as the baseline for the students and then used quarterly benchmark exams from quarters one and two to determine if there was a difference in academic achievement between the two pathways Results indicated that the Algebra 1 students scored better than the Integrated Mathematics 1 students on the quarter one and two benchmarks

The Effects of "Math Pathways and Pitfalls" on Students'

Mathematics Achievement Joan I. Heller,Deborah A. Curtis,Sophia Rabe-Hesketh,Carol J. Verboncoeur,2007 This study was designed to assess the impact of Mathematics Pathways and Pitfalls MPP on the mathematics that second fourth and sixth grade students learn The specific research questions that were addressed are a What is the impact of MPP on students knowledge of the mathematics topics addressed compared to that of students using the regular math curriculum and b How equitable is the impact of MPP on students mathematics knowledge across levels of English language proficiency and entering mathematics ability A cluster randomized experimental design was implemented in five school districts In the first year of the study second fourth and sixth grade teachers were randomly assigned within their school districts to either an experimental or a control group The experimental group teachers were taught how to implement MPP during a six hour professional development session In the first year of the study experimental group teachers substituted MPP for a portion of their regular mathematics curriculum The control group teachers used their regular mathematics curriculum and received whatever professional development they normally were provided during that year A total of 99 teachers and 1 971 students participated in the first year of the study The MPP Pitfalls Quiz was the primary instrument used to measure students mathematical knowledge A separate MPP Pitfalls Quiz was developed for each grade level Items on the MPP Pitfalls Quizzes assess concepts and procedures that are known to cause difficulty for students In addition to the MPP Pitfalls Quizzes standardized mathematics achievement test score data were collected Multilevel statistical models were used to analyze the achievement test data These analyses showed that student math performance in MPP classes was higher than in non MPP classes for all three grade levels With respect to the impact of MPP on students mathematics knowledge across levels of English language proficiency we found that for second and fourth grades MPP impacted ELL and non ELL students equally The effect size statistics ESS for second and fourth grade were 0 43 and 0 66 respectively For sixth grade MPP had a greater treatment effect for ELL students ESS 0 74 than non ELL students ESS 0 28 Teachers expressed strongly positive opinions about the value of the program including that their students understood the math topics in the lessons better than students in past years and that MPP helped most of their students learn the math concepts and prevent pitfalls Contains 29 tables Mathematics Pathways and Pitfalls materials presented in this document were developed by the Mathematics Case Methods
