Mathematics And Computer Science Algorithms Trees Combinatorics And Probabilities:

Mathematics and Computer Science Danièle Gardy,2000 This is the first book where mathematics and computer science are directly confronted and joined to tackle intricate problems in computer science with deep mathematical approaches It contains a collection of refereed papers presented at the Colloquium on Mathematics and Computer Science held at the University of Versailles St Quentin on September 18 20 2000 The colloquium was a meeting place for researchers in mathematics and computer science and thus an important opportunity to exchange ideas and points of view and to present new approaches and new results in the common areas such as algorithms analysis trees combinatorics optimization performance evaluation and probabilities The book is intended for a large public in applied mathematics discrete mathematics and computer science including researchers teachers graduate students and engineers It provides an overview of the current questions in computer science and related modern mathematical methods The range of applications is very wide and reaches beyond computer science **Mathematics and Computer Science II** Brigitte Chauvin,Philippe Flajolet,Daniele Gardy,Abdelkader Mokkadem,2012-12-06 This is the second volume in a series of innovative proceedings entirely devoted to the connections between mathematics and computer science Here mathematics and computer science are directly confronted and joined to tackle intricate problems in computer science with deep and innovative mathematical approaches The book serves as an outstanding tool and a main information source for a large public in applied mathematics discrete mathematics and computer science including researchers teachers graduate students and engineers It provides an overview of the current questions in computer science and the related modern and powerful mathematical methods The range of applications is very wide and reaches beyond computer science Mathematics and Computer Science Daniele Gardy,Abdelkader Mokkadem,2000-09-01 Mathematics and Computer Science III Michael Drmota,Philippe Flajolet,Danièle Gardy,Bernhard Gittenberger,2004-07-23 Mathematics and Computer Science III contains invited and contributed papers on combinatorics random graphs and networks algorithms analysis and trees branching processes constituting the Proceedings of the Third International Colloquium on Mathematics and Computer Science held in Vienna in September 2004 It addresses a large public in applied mathematics discrete mathematics and computer science including researchers teachers graduate students and engineers *Algorithms, Trees, Combinatorics and Probabilities* International Colloquium on Mathematics and Computer Science (5, 2008, Blaubeuren),2008 **Graph-Theoretic Concepts in Computer Science** Juraj Hromkovič,Manfred Nagl,Bernhard Westfechtel,2005-01-25 During its 30 year existence the International Workshop on Graph Theoretic Concepts in Computer Science has become a distinguished and high quality computer science event The workshop aims at uniting theory and practice by demonstrating how graph theoretic concepts can successfully be applied to v ious areas of computer science and by exposing new theories emerging from applications In this way WG provides a common ground for the exchange of information among people dealing with several graph problems

and working in various disciplines Thereby the workshop contributes to forming an interdis plinary research community The original idea of the Workshop on Graph Theoretic Concepts in C puter Science was ingenuity in all theoretical aspects and applications of graph concepts wherever applied Within the last ten years the development has strengthened in particular the topic of structural graph properties in relation to computational complexity This workshop has become pivotal for the c munity interested in these areas An aimspeci c to the 30thWG was to support the central role of WG in both of the prementioned areas on the one hand and on the other hand to promote its originally broader scope The 30th WG was held at the Physikzentrum Bad Honnef which serves as the main meeting point of the German Physical Society It o ers a secluded setting for research conferences seminars and workshops and has proved to be especiallystimulatingforfruitful discussions Talksweregiveninthenewlecture hall with a modern double rear projection interactive electronic board and full video conferencing equipment   *Theory and Applications of Models of Computation* Rahul Jain,Sanjay Jain,Frank Stephan,2015-04-15 This book constitutes the refereed proceedings of the 12th Annual Conference on Theory and Applications of Models of Computation TAMC 2014 held in Singapore in May 2015 The 35 revised full papers presented were carefully reviewed and selected from 78 submissions The papers treat all topics relating to the theory and applications of models computation for example recursion theory and mathematical logic computational complexity and Boolean functions graphy theory quantum computing parallelism and statistics learning automata and probabilistic models parameterised complexity   Cryptographic Applications of Analytic Number Theory Igor Shparlinski,2003-02-12 The book introduces new ways of using analytic number theory in cryptography and related areas such as complexity theory and pseudorandom number generation Cryptographers and number theorists will find this book useful The former can learn about new number theoretic techniques which have proved to be invaluable cryptographic tools the latter about new challenging areas of applications of their skills   *Random Trees* Michael Drmota,2009-04-16 The aim of this book is to provide a thorough introduction to various aspects of trees in random settings and a systematic treatment of the mathematical analysis techniques involved It should serve as a reference book as well as a basis for future research   **The Mathematics Education** ,2001   **Approximation Algorithms for Combinatorial Optimization** ,2004   **Fourth colloquium on mathematics and computer science** ,2006   **Combinatorics, Complexity, and Chance** Geoffrey Grimmett,Colin McDiarmid,2007 Professor Dominic Welsh has made significant contributions to the fields of combinatorics and discrete probability including matroids complexity and percolation and has taught influenced and inspired generations of students and researchers in mathematics This volume summarizes and reviews the consistent themes from his work through a series of articles written by renowned experts These articles contain original research work set in a broader context by the inclusion of review material As a reference text in its own right this book will be valuable to academic researchers research students and others seeking an introduction to the relevant contemporary aspects of these fields   *Ars Combinatoria* ,2007
