Recent recommendations from a variety of sources state that reforming teacher preparation in postsecondary institutions is central in providing quality mathematics education to all students. The Mathematics Teacher Preparation Content Workshop examined this problem by considering two central questions: What is the mathematical knowledge teachers need to know in order to teach well? How can teachers develop the mathematical knowledge they need to teach well? The Workshop activities focused on using actual acts of teaching such as examining student work, designing tasks, or posing questions as a medium for teacher learning. The Workshop proceedings, *Knowing and Learning Mathematics for Teaching*, is a collection of the papers presented at the activities and plenary sessions that took place. [Mathematics for Elementary Teachers with Activities](#), Sybilla Beckmann, 2017-01-10. For courses in Math for Future Elementary Teachers. Empowering Tomorrow's Math Teachers. *Mathematics for Elementary Teachers with Activities*, 5th Edition, connects the foundations of teaching elementary math and the why behind procedures, formulas, and reasoning so students gain a deeper understanding to bring into their own classrooms. Through her text, Beckmann teaches mathematical principles while addressing the realities of being a teacher. With in-class collaboration and activities, she challenges students to be actively engaged. An inquiry-based approach to this course allows future teachers to learn through exploration and group work, leading to a deeper understanding of mathematics. Known for her contributions in math education, Beckmann writes the leading text for the inquiry approach in *Mathematics for Elementary Teachers with Activities*; students engage, explore, discuss, and ultimately reach a true understanding of mathematics. Beckmann's text covers the Common Core State Standards for Mathematics (CCSSM), now implemented in most states. However, states not following Common Core will not find the information intrusive in the text. Also available with MyLab Math, MyLab Math is an online homework tutorial and assessment program designed to work with this text to engage students and improve results. The Skills Review MyLab Math provides review and skill development that complements the text, helping students brush up on skills needed to be successful in class. The MyLab Math course does not mirror the problems from the text but instead covers basic skills needed prior to class, eliminating the need to spend valuable class time re-teaching basics that students should already know. This enables students to have a richer experience in the classroom while working through the book's activities and problems. In addition to basic skills review, the MyLab Math course includes a wealth of resources to help students visualize the concepts and understand how they come into play in an elementary classroom. These include IMAP videos, Responding to Students Videos, eManipulatives, and brand new Common Core videos, Demonstration videos, and GeoGebra animations.
