Multicriterion Decision In Management Principles And Practice:

Multicriterion Decision in Management Jean-Charles Pomerol, Sergio Barba-Romero, 2011-09-26 Multicriterion Decision in Management Principles and Practice is the first multicriterion analysis book devoted exclusively to discrete multicriterion decision making Typically multicriterion analysis is used in two distinct frameworks Firstly there is multiple criteria linear programming which is an extension of the results of linear programming and its associated algorithms Secondly there is discrete multicriterion decision making which is concerned with choices among a finite number of possible alternatives such as projects investments decisions etc This is the focus of this book The book concentrates on the basic principles in the domain of discrete multicriterion analysis and examines each of these principles in terms of their properties and their implications In multicriterion decision analysis any optimum in the strict sense of the term does not exist Rather multicriterion decision making utilizes tools methods and thinking to examine several solutions each having their advantages and disadvantages depending on one's point of view Actually various methods exist for reaching a good choice in a multicriterion setting and even a complete ranking of the alternatives The book describes and compares these methods so called aggregation methods with their advantages and their shortcomings Clearly organizations are becoming more complex and it is becoming harder and harder to disregard complexity of points of view motivations and objectives The day of the single objective profit social environment etc is over and the wishes of all those involved in all their diversity must be taken into account To do this a basic knowledge of multicriterion decision analysis is necessary The objective of this book is to supply that knowledge and enable it to be applied The book is intended for use by practitioners managers consultants researchers and students in engineering and business

A Strategy for Using Multicriteria Analysis in Decision-Making Nolberto Munier, 2011-07-10 This book develops a whole strategy for decision making with the full participation of the decision maker and utilizing continuous feedback It introduces the use of the very well known and proven methodology linear programming but specially adapted for this purpose For this it incorporates a method to include subjective concepts as well as the possibility of working with many different and even contradictory objectives The book is liberally populated with diverse case studies to illustrate the concepts This practical guide will be of interest to anyone undertaking analysis and decision making on both simple and complex projects and who is looking for a strategy to organize classify and evaluate the large amount of information required to make an informed decision The strategy includes methods to analyze the results and extract conclusions from them
