*Aspects of Multivariate Statistical Analysis in Geology* E. Savazzi, R.A. Reyment, 1999-11-24 The book presents multivariate statistical methods useful in geological analysis The essential distinction between multivariate analysis as applied to full space data measurements on lengths heights breadths etc and compositional data is emphasized with particular reference to geochemical data Each of the methods is accompanied by a practically oriented computer program and backed up by appropriate examples The computer programs are provided on a compact disk together with trial data sets and examples of the output An important feature of this book is the graphical system developed by Dr Savazzi which is entitled Graph Server Geological data often deviate from ideal statistical requirements For this reason close attention has been paid to the analysis of data that contain atypical observations

*Paleontological Data Analysis* Øyvind Hammer, David A. T. Harper, 2024-03-04 PALEONTOLOGICAL DATA ANALYSIS An up to date edition of the indispensable guide to analysing paleontological data Paleontology has developed in recent decades into an increasingly data driven discipline which brings to bear a huge variety of statistical tools Applying statistical methods to paleontological data requires a discipline specific

understanding of which methods and parameters are the most appropriate ones and how to account for statistical bias inherent in the fossil record By guiding the reader to these and other fundamental questions in the statistical analysis of fossilized specimens *Paleontological Data Analysis* has become the standard text for anyone with an interest in quantitative analysis of the fossil record Now fully updated to reflect the latest statistical methods and disciplinary advances it is an essential tool for practitioners and students alike Readers of the second edition of *Paleontological Data Analysis* readers will also find New sections on machine learning Bayesian inference phylogenetic comparative methods analysis of CT data and much more New use cases and examples using PAST R and Python software packages Full color illustrations throughout *Paleontological Data Analysis* is ideal for paleontologists evolutionary biologists taxonomists and students in any of these fields

**Numerical Palaeobiology** D. A. T. Harper, 1999-07-09 *Numerical Palaeobiology Computer Based Modelling and Analysis of Fossils and their Distributions* Edited by David A T Harper University of Copenhagen Denmark Microcomputers have become an everyday part of the palaeobiologists tool kit Moreover there is now a wide range of computer software available to handle all sorts of palaeontological data and problems This book aimed at final year undergraduates graduate students and professional palaeontologists biologists and geologists brings together the many strands of contemporary palaeontology through the medium of numeracy It provides a comprehensive review with applications of the many computer based techniques available for the analysis and modelling of palaeontological data The first part of the book covers classical phenetic taxonomy through cladistics and the computer generated reconstructions of fossils to actual models for fossil growth This leads onto distribution analysis and modelling of fossils in time and space Detailed stratigraphical distributions of fossils are described in quantitative terms together with the larger scale patterns in the history of life itself while palaeoecology palynofacies trace fossils and palaeogeography are all introduced through a spectrum of numerical algorithms The majority of the studies are linked to specific software packages and many are illustrated with case histories Although there are a number of books available on computer modelling and data analysis in geology no study has integrated the two with such a range of palaeontological subject material

Slice, 2013-11-11 This volume is based on the NATO Advanced Study Institute *Advances in Morphometrics* held in 11 Ciocco Tuscany Italy from July 18 30 1993 and directed by Leslie F Marcus The *Advances in Morphometrics ASI* was advertised in *Nature* and a number of professional journals Announcements were sent to relevant institutions and departments throughout the world Because NATO required that the majority of attendees be from NATO countries the 71 persons attending represented nine NATO countries four eastern European countries now recognized as equal partners for ASI and a few participants from non NATO countries Participants were all active scholars in different disciplines within biology as well as computer science statistics geology and paleontology Their experience ranged from that of graduate students to senior faculty as well as one emeritus scholar A complete list of the those attending and their

addresses phone and FAX numbers and where available e mail addresses is given in the participants list All the local arrangements were made by Marco Corti and Anna Loy of the University of Rome Ia Sapienza They made the initial contact with the II Ciocco conference center and then arranged for computer and Xerox rentals design of logos organization of posters and publication of poster abstracts
