Multimedia In Action:

Multimedia in Action! Linda Tway, 1995-01-01 This book provides a look into what other companies are doing with multimedia through actual examples of real systems. Through these examples readers will discover how award winning multimedia titles have been developed for use in sales training education entertainment and referencing. CD includes demonstration software and examples of many titles profiled in the book [Multimedia in Action](#) James E. Shuman, 1998. This book is a comprehensive yet manageable hands on introduction to multimedia. More than a textbook it is a teaching and learning package that includes an interactive CD ROM and a Web page. It helps students learn about the practical application of multimedia as well as giving them insight and practice into how to produce multimedia titles [Mobile Multimedia in Action](#) Ilpo Koskinen, 2011-12-31. Mobile Multimedia in Action displays a revealing picture of how people communicate using camera phones and other mobile multimedia devices. With such devices spreading faster than practically any other new technology questions about how these devices are being used and abused to capture and distribute embarrassing or raunchy images and content and what should be done about it are surfacing. This volume presents the first detailed study of the use of these devices. Using a variant of social science research known as ethnomethodology Koskinen explores the kinds of images people take with camera phones and how they use sound to enhance these images. The book asks two main questions. First what kinds of methods of expression such as visuals or sound do people use when they design multimedia messages. Second how do people interact with and respond to each other through mobile multimedia devices. Koskinen has a broader objective centering on the impact of these devices on human relationships and society at large. He asks what do people do with these devices. Is mobile telephony moving toward a more practical direction or will it simply become a visual chatty channel fit for gossip but not for real news or other practical purposes. What kind of social activities and organizations does it best serve peer to peer networks or institutional ones. Koskinen examines these questions from three unique perspectives the design elements of mobile multimedia which considers methods of expression people use in designing multimedia messages mobile multimedia as interaction which looks into how people interact with each other using this technology and makes a case for studying multimedia as a naturally occurring activity and mobile multimedia in society which searches for answers as to the societal consequences of mobile multimedia usage. A groundbreaking work Mobile Multimedia in Action will be a fascinating read for both multimedia device professionals and everyday users alike. Providing a glimpse into the future Koskinen asks where mobile multimedia technology is taking mankind and society [Mobile Multimedia in Action](#) Ilpo Kalevi Koskinen, 2007.
