Campbell, 1990 **Working Across Borders** Douglas van den Berghe, 2007 This book represents the completion of a long research agenda which has produced new and relevant data on the nature of multinational enterprise MNE activity with special reference to employment The author has a good database and a good basic idea testing the employment effects of MNEs on a regional basis The last focus on the regional rather than global nature of MNEs and public policy is particularly useful since intra regional sales dominate global sales and employment The book should draw a good amount of attention Alan M Rugman University of Reading UK Multinationals and Employment in Indonesia Hal Hill, 1991 Grensoverschrijdend Werken Douglas A. OECD Guidelines for Multinational Enterprises and show how the principles these instruments enunciate act as a countervailing power to the international economic decision making of multinational corporations The authors cite relevant cases and highlight emerging trends in this important area of labour law Annexes reprint all four of the instruments The Globalization of Labour Standards will be welcomed by all sectors of the labour and employment law community as a fully realized analysis of what is currently available to those who would like to ensure economic and social progress in a world dominated by multinational corporations BOOK JACKET
