Dissociation ,1991 **Cultic Studies Journal** ,2000 *Multiple Personalities, Multiple Disorders* Carol S. North,1993 The existence and characteristics of multiple personality disorder MPD have been debated from the time of the first case reports in the 19th century The dispute has never been resolved and MPD has become the most controversial syndrome known to mental health professionals Currently very little balanced academic material on this disorder is available and much of the literature aims to disprove its existence as a psychiatric disorder In the past general understanding of MPD was guided largely by this medical literature but in recent decades the disorder has been widely exposed to both professionals and the public through the mass media This timely work examines MPD from an empirical viewpoint describing the research that has been done on the disorder as well as providing in depth analysis of how MPD has developed over the years in relation to the media The book identifies the earliest origins of MPD in published literature and traces the course of its development as a concept to the present Existing data on MPD are presented in a detailed review of the current state of knowledge of the disorder including clinical description delineation from other disorders family history studies follow up

Ross, 1989-10-24 This account of multiple personality disorder MPD and related dissociative disorders presents the latest findings leading to a new model of MPD and a new therapeutic approach to its treatment The book examines the large cluster of symptoms and dysfunctions associated with MPD focusing on diagnosis clinical features and the relationship of MPD to other diagnoses Data and clinical evidence are presented for a widely accepted but as yet unproven hypothesis that MPD arises as a dissociative strategy for coping with severe childhood trauma usually involving physical or sexual abuse
