Teach Your Child the Multiplication Tables, Fast, Fun and Easy Eugenia Francis, 2013-06-05 Teach Your Child the Multiplication Tables 2nd Edition Like most third graders my son found learning the multiplication tables through rote memorization a challenge After an afternoon of tiresome drills I knew there had to be a better way I drew a grid for tables 1 10 Not surprisingly Scott knew tables 1 2 5 and 10 the tables with easy patterns Well then why not find patterns for the rest of the tables Tables for EVEN numbers 2 4 6 and 8 we discovered end in some combination of 2 4 6 8 0 and are easy to learn Tables for ODD numbers we found also have distinct patterns Patterns made Scott smile He could see the underlying structure and knew he got it right The traditional method of learning one math fact at a time such as 8×6 is not only difficult but highly inefficient Rote memorization is passive and mechanical Students

typically find it boring Why not learn one pattern for the entire table Discovering patterns is active creative and engaging The essence of mathematics is patterns Learning to recognize patterns at an early age develops analytical skills Patterns greatly benefit children with special needs such as those with ADD ADHD autism and dyslexia They can better recall and visualize the table when they see a pattern This is true for all children Patterns aid recall My workbook utilizes both left and right brain strategies to teach multiplication There are marked differences between children who are left hemisphere dominant and those who are right dominant Whereas the left hemisphere dominant child can construct the whole from the parts the right dominant prefers the big picture seeing patterns and making connections Special needs children are often right brain dominant Learning the multiplication tables is much easier when both hemispheres are engaged It is the responsibility of parents and teachers to ensure children learn the multiplication tables Without them a child will not progress beyond third grade math Fractions decimals percentages and algebra will be beyond a child's reach In California the number one reason students do not graduate from high school is failure to pass algebra A leading cause is failure to master the times tables It is a national disgrace that fifteen year olds in the U S rank near the bottom of industrialized nations in math skills We must reverse this alarming trend The time to intervene is in the third grade Teachers why not a more effective approach to the multiplication tables than the drill and kill of rote memorization Why not bring the magic of math into the classroom If all third graders were to genuinely like math they would be more likely to succeed in school Parents too must do their part Parents have a huge influence over a third grader By high school it may be too late Mastery of the multiplication tables is essential to your child's future The goal of this workbook is not only multiplication mastery for all children but to instill in them a love of numbers and fascination with math Free instructional TeaChildMath™ videos can be found on YouTube

Terrible Times Tables Michelle Markel, 2019-08-06 A modern multiplication primer that tackles the terrors of a typical school year Learning math has never been this much fun Inspired by a Victorian math primer Terrible Times Tables is a modern take on learning one's multiplication tables from numbers 2 to 10 featuring elementary school themes of homeroom field trips cafeteria food holidays and recitals Featuring a reluctant narrator and a few unwitting critters learning math has never been so much fun or amusing

A Remarkable Collection of Babylonian Mathematical Texts Jöran Friberg, 2007-10-01 The sub collection of mathematical cuneiform texts in the Schøyen Collection makes a substantial addition to the known corpus of such texts It contains 121 texts not counting 151 multiplication tables and 53 small weight stones According to the catalog at the end of the Index of Subjects below where

those 121 mathematical texts are ordered by content nearly all known kinds and some new kinds of mathematical cuneiform texts are represented in the collection Therefore it has been possible to organize the present work as a broad general account of Mesopotamian mathematics illustrated mainly by texts from the Sch yon Collection but occasionally also by previously published texts The general disposition of the book is borrowed from my own concise but comprehensive survey of Mesopotamian mathematics in the article on Mathematics in Reallexikon der Assyriologie vol 7 1990 My ambition has been to make the account easily accessible to all kinds of readers yet still as detailed and exhaustive as possible For that purpose there is for instance an introductory Chapter 0 on how to get a better understanding of mathematical cuneiform texts The chapter begins with a discussion of the danger of unintentional anachronisms in translations of pre Greek mathematical texts and continues with a presentation of the kind of conform transliterations translations and interpretations true to the original that will be used throughout the book in discussions of individual texts

Andrew Brodie the Let's Do series is the ideal home learning resource for children. Expertly designed to meet all the demands of the National Curriculum, the workbooks provide all the practice children need to build their confidence and boost their ability. This new series provides all the practice a child needs to build confidence in multiplication and division. More than 400 questions offer great revision of essential multiplication tables facts and guide every child through the processes of short and long multiplication and short and long division. Easy and Fun Multiplication Workbook for Kids Professional

Schoolprep, 2019-04-04 Learning multiplication is an important foundation for learning different aspects of mathematics such as division, algebra, long multiplication, and even fractions. For students that don't have a solid grasp of the times tables, they may find these other areas to be hard to understand as well. So this workbook provides 5000 multiplication exercises for kids to practice every day to gain confidence and fluency. When a child becomes capable of recalling multiplication tables without much difficulty, it helps him to solve problems faster. Most problems in mathematics involve some multiplication in the process. Since the child becomes capable of recalling multiplication tables easily, it takes him less time in solving problems.
