Wages of Violence Thomas Blom Hansen, 2018-06-05 When Bombay changed its name to Mumbai in 1995 it was the culmination of a long process that transformed India's primary symbol of modernity and cultural diversity into a site of intense ethnic conflict and violent nationalism. Wages of Violence is a startling account of how the city's atmosphere dominant public languages and power structures have changed since the 1960s. The book centers on how Shiv Sena a militant Hindu movement has advanced a new plebeian political culture and has undermined democratic rule in India's premier city. Drawing on a large body of archival material and conversations with people from all walks of life Thomas Blom Hansen paints a vivid picture of this dynamic and violent movement. Challenging conventional views of recent trends in Indian politics Hansen shows that the xenophobic public culture of today's Mumbai has deep roots in the region's history and its contested identities. We are also given revealing insights into the city's Muslim communities and the

authorities understanding and control of the ethno religious subcultures in the city. Hansen argues cogently that Shiv Sena's success represents the violent possibilities of the vernacularization of democracy in India. Unfolding at a juncture where the globalization of India's economy is having a deepening impact on the lives of ordinary people this is a story that resonates with the directions urban growth is taking both elsewhere in India and beyond

Cities and Identities

Daniel A. Bell,Avner de Shalit,2025-05-09 This book illustrates how cities possess unique normative identities referred to as ethoses and how the residents shape and perceive them The question of identity and which social relations constitute it has been a central topic in philosophy and social science for centuries While

the state played a key role in shaping identity during the 20th century its influence has waned in recent years due to market pressures international agreements migration and institutions like the IMF which limit state autonomy hence its ability to design policies that sustain and enhance particular national identities This collection argues that cities are emerging as new sources of identity possessing their own ethoses distinctive normative characters The contributors explore this idea through six cities London Qingdao Tokyo Mumbai Istanbul and Amsterdam Their analysis draws on extensive document research personal experiences urban exploration and interviews with residents from diverse social ethnic and gender backgrounds This book was originally published as a special issue of Critical Review of International Social and Political Philosophy
