*Sexual Murder* Louis B. Schlesinger, 2021-03-22 Sexual Murder Catathymic and Compulsive Homicides is the culmination of the author's 45 years of experience with and studying sexually motivated homicide. Sexual murders are generally of two types: catathymic and compulsive. Catathymic homicides are caused by a breakthrough of underlying sexual conflicts. They can be unplanned, explosive, acute attacks or planned murders stemming from a chronic obsession with or disturbed attachment to the victim. In compulsive homicides, a fusion of sex and aggression results in a powerful internal drive which pushes the offender to seek out victims to kill and the killing itself is sexually gratifying. These murders also may be planned or unplanned. In compulsive homicides that are unplanned, the urge breaks through and disrupts the offender's controls when a victim of opportunity crosses his path. The compulsive offender who plans his crimes often eludes law enforcement and as a result, he can have multiple serial victims over extended periods of time. Both forms of sexual murder—the catathymic and the compulsive—are presented in this volume from a clinical descriptive perspective encompassing case studies with analysis. Recent advances in empirical research in sexual murder, including findings from the joint research project between John Jay College of Criminal Justice and the FBI Behavioral Analysis Unit in Quantico, have published many important studies. These include such topics as necrophilia, foreign object insertions in sexual homicide, ritual and signature, and temporal patterns in serial sexual homicide, mass murder, crime scene staging in homicide, and undoing symbolic reversal at homicide scenes. All such research will be included and incorporated into this fully updated Second Edition, including approximately fifty new clinical case studies.

Current theories of sexual murder, its prevalence, reasons, including attachment theories, profiling and interrogation techniques are all addressed in Proulx's distinctive thought provoking style.

*Sexual Behavior* Nathaniel McConaghy,2013-11-21 Many issues remain unresolved in sexuality In some cases this is because the information is not available to resolve them In others it is but the available conclusions the information supports block its acceptance because they conflict with the positions of dominant groups in the politics of sexuality Possibly the most obvious example is the determination of many theorists to ignore the evidence that while men rarely report being sexually assaulted when questioned in community surveys they make up a third of the victims and a quarter of the perpetrators of sexual assault are women These findings are incompatible with the feminist theory that sexual assault is not a sexual act but normal male behavior motivated politically to maintain men's dominance of women Most research supporting the theory investigated women only as victims and men only as aggressors Some feminists have dismissed the need for any research to support their beliefs on the ground that such research is busy work establishing what women already know One belief considered not to require research is that heterosexual pornography made for a male audience increases the prevalence of rape by encouraging rape supportive attitudes of male aggression and female submission No criticism has been directed at the soft core pornography of Mills and Boon stories written for women that promote similar attitudes
