Science journalism has perhaps never been so critical to our world and the demands on science journalists have never been greater. On any given day a science journalist might need to explain the details of genetic engineering, analyze a development in climate change research or serve as a watchdog helping to ensure the integrity of the scientific enterprise. And science writers have to spin tales seductive enough to keep readers hooked to the end despite the endless other delights just a click away. How does one do it? Here for the first time is a collection of indispensable articles on the craft of science writing as told by some of the most skillful science journalists working today. These selections are a wealth of journalistic knowledge from The Open Notebook, the online community that has been a primary resource for science journalists and aspiring science writers for the last decade. The Craft of Science Writing gives you a crew of accomplished encouraging friends to whisper over your shoulder as you work. In these pages you will find interviews with leading journalists offering behind-the-scenes inspiration as well as in-depth essays on the craft offering practical advice including: How to make the transition into science writing; How to find and pitch a science story to editors; How to wade through a sea of technicalities in scientific papers to spot key facts; How to evaluate scientific and statistical claims; How to report on controversial topics; How to structure a science story from short news to long features; How to engage readers in a science story and hold their attention to the end.

This is the official text for the National Association of Science Writers. In the eight years since the publication of the first edition of *A Field Guide for Science Writing*, much about the world has changed. Some of the leading issues in today's political marketplace—embryonic stem cell research, global warming, health care reform, space exploration, genetic privacy, germ warfare—are informed by scientific ideas. Never has it been more crucial for the lay public to be scientifically literate. That's where science writers come in. And that's why it's time for an update to the Field Guide, already a staple of science writing graduate programs across the country. The academic community has recently recognized how important it is for writers to become more sophisticated, knowledgeable, and skeptical about what they write. More than 50 institutions now offer training in science

writing In addition mid career fellowships for science writers are growing giving journalists the chance to return to major universities for specialized training We applaud these developments and hope to be part of them with this new edition of the Field Guide In A Field Guide for Science Writers 2nd Edition the editors have assembled contributions from a collections of experienced journalists who are every bit as stellar as the group that contributed to the first edition In the end what we have are essays written by the very best in the science writing profession These wonderful writers have written not only about style but about content too These leaders in the profession describe how they work their way through the information glut to find the gems worth writing about We also have chapters that provide the tools every good science writer needs how to use statistics how to weigh the merits of conflicting studies in scientific literature how to report about risk And ultimately how to write

Reporting on Risks Albert Okunade, Jim Willis, 1997-07-30 Health and safety risk issues such as AIDS hazardous waste disposal airline disasters and health care policy frequently dominate the news and require a new level of sensitivity and expertise on the part of journalists This volume focuses on a study of the trends in risk reporting and offers guidelines on how to report the dangers of these risks more accurately It also examines the ethical implications of reporting risks to the public This work will be of interest to those studying communication specifically in the areas of ethics in journalism and public health and medical reporting

From Yahweh to Yahoo! Doug Underwood, 2002-04-02 Presenting religion as journalism's silent partner From Yahweh to Yahoo provides a fresh and surprising view of the religious impulses at work in the typical newsroom by delving into the largely unexamined parallels between religious and journalistic developments from the media of antiquity to the electronic idolatry of the Internet

Communicating Uncertainty Sharon M. Friedman, Sharon Dunwoody, Carol L. Rogers, 2012-10-12 Exploring the interactions that swirl around scientific uncertainty and its coverage by the mass media this volume breaks new ground by looking at these issues from three different perspectives that of communication scholars who have studied uncertainty in a number of ways that of science journalists who have covered these issues and that of scientists who have been actively involved in researching uncertain science and talking to reporters about it In particular Communicating Uncertainty

examines how well the mass media convey to the public the complexities ambiguities and controversies that are part of scientific uncertainty In addition to its new approach to scientific uncertainty and mass media interactions this book distinguishes itself in the quality of work it assembles by some of the best known science communication scholars in the world This volume continues the exploration of interactions between scientists and journalists that the three coeditors first documented in their highly successful volume *Scientists and Journalists Reporting Science as News* which was used for many years as a text in science journalism courses around the world
