New Public Managers In Europe:

Public Administration Reforms in Europe Gerhard Hammerschmid, Steven Van de Walle, Rhys Andrews, Philippe Bezes, 2016-06-24 Based on a survey of more than 6700 top civil servants in 17 European countries this book explores the impacts of New Public Management NPM style reforms in Europe from a uniquely comparative perspective It examines and analyses empirical findings regarding the dynamics major trends and tools of administrative reforms with special focus on the diversity of top executives perceptions about the effects of those reforms

New Public Managers in Europe David Farnham, 2016-07-27 Many changes are taking place in the public sector across Europe as emphasis is being placed on the efficient use of resources the way that public organisations are managed and their relationship with clients and customers Post bureaucratic structures are being introduced and a more managerialist culture is being established A new type of public servant is emerging the public manager This book consists of three theoretical chapters and nine case studies of public managers which examine these changes amongst member states of the European Union The concluding chapter identifies common trends and explains similarities and differences in terms of the constitutional political cultural and economic contexts

New Public Management in Europe C. Pollitt, S. Van Thiel, V. Homburg, Sandra Van Thiel, 2007-01-09 The New Public Management paradigm seems to have produced a convergence of administrative reform However specific implementations of NPM show range of forms and results including performance indicators personal reforms and evaluations of reforms This text demonstrates how NPM is crafted differently in various institutional contexts

New Public Management Kate McLaughlin, Stephen P. Osborne, Ewan Ferlie, 2002 This book offers a comprehensive and multidisciplinary analysis of the impact of the new public management in the UK and throughout the world and situates these lessons in a broader comparative perspective

Public and Social Services in Europe Hellmut Wollmann, Ivan Koprić, Gérard Marcou, 2016-07-12 This book presents comparative analyses and accounts of the institutional changes that have occurred to the local level delivery of public utilities and personal social services in countries across Europe Guided by a common conceptual frame and written by leading country experts the book pursues a developmental approach to consider how the public municipal sector centred institutionalization of service delivery climaxed in the 1970s developed through its New Public Management inspired and European Union market liberalization driven restructuring of the 1980s and early 1990s The book also discusses the most recent phase since the late 1990s which has been marked by further marketization and privatization of service delivery on the one hand and some return to public sector provision remunicipalization on the other By comprising some 20 European countries including Central East European transformation countries as well as the sovereign debt stricken countries of Southern Europe the chapters of this volume cover a much broader cross section of countries than other recent publications on the same subject

Citizens and the New Governance Luc Rouban, 1999 This book addresses the relationship of citizenship and public management in Europe After fifteen years of State reform it is time

for an overall discussion of the theoretical and empirical impact and limits of New Public Management as one of the latest reorientations in public administration on the practice of citizenship. All the authors have pointed out the tension between a focus on improvement of state bureaucracies on the one hand and the involvement of citizens in the co-production of policies on the other. They point to a fundamental change that is taking place: the importance of state apparatuses for the development and sustainability of viable societies is being de-emphasised and special attention to governance is now taking over the central place that for so long has been occupied by attention to government. Through the co-production of public policies by citizens and public authorities working together, a new civil society is emerging. This book highlights the fact that the re-invention of the citizen is of crucial importance to public administrative practice as well as to the various public administration disciplines in Europe.

Public Management and Administrative Reform in Western Europe Walter Julius Michael Kickert, 1997. This important book presents new work by respected scholars in the field of public administration in Europe and evaluates both American and European approaches to public sector management and administrative reform. The book begins with introductory chapters examining public management in Europe and the United States and explores the paradoxes that exist in administrative reform. Part two presents a wide range of case studies of European management reforms including the United Kingdom, France, Austria, Spain, Germany, the Netherlands and Switzerland. It offers a balanced view of the managerial trend which appears to be sweeping across Western Europe. This is achieved by presenting the full spectrum of case studies from success to failure. Balance is created by presenting counter arguments and criticisms of the prevailing trend of reform. The third part considers management, legal state and democracy. Finally, the volume concludes with a North American perspective on the administrative reform in Europe. *Public Management and Administrative Reform* will be indispensable to academics, policymakers and management practitioners in the public sector, especially those working within Europe.
