

Nolan Brian

P. Kirby

Nolan Brian:

The Celtic Tiger in Distress P. Kirby, 2016-01-22 Ireland's Celtic Tiger economy has been held up as a model of successful development in a globalized world offering lessons for other late developing countries. It interrogates the principal theoretical approaches which have been used to analyze the Celtic Tiger particularly neo-classical economics and finds them inadequate to capture its ambiguities or address its developmental deficit. Elaborating an alternative approach drawing particularly on the work of Karl Polanyi the book offers an interpretation which captures more fully the ways in which the Irish State has made itself subservient to market forces. The options now facing Irish society are mapped out through a critical examination of globalization identifying possibilities for development and social action. *Understanding Meaning and Knowledge Representation* Eva Mestre, 2016-01-14 Today there is a need to develop natural language processing NLP systems from deeper linguistic approaches. Although there are many NLP applications which can work without taking into account any linguistic theory this type of system can only be described as deceptively intelligent. On the other hand however those computer programs requiring some language comprehension capability should be grounded in a robust linguistic model if they are to display the expected behaviour. The purpose of this book is to examine and discuss recent work in meaning and knowledge representation within theoretical linguistics and cognitive linguistics particularly research which can be reused to model NLP applications. Exploring Functional-Cognitive Space Christopher S. Butler, 2014-08-28 This book intended primarily for researchers and advanced students expands greatly on previous work by the authors exploring the topography of the multidimensional functional cognitive space within which functional cognitive and/or constructionist approaches to language can be located. The analysis covers a broad range of 16 such approaches with some additional references to Chomskyan minimalism and is based on 58 questionnaire items each rated by 29 experts on particular models for their importance in the model concerned. These ratings are analysed statistically to reveal overall patterns of dissimilarity across models. The questionnaire ratings and experts' comments are then used together with the authors' close reading of the literature in detailed discussion leading to a final dichotomous rating for each feature in each model the results again being analysed statistically. The final chapter presents the overall conclusions and suggests how existing collaborations between approaches could be strengthened and new ones created in future research. *Exploring Functional Cognitive Space* has been awarded the 2016 prize of the Spanish Association for Applied Linguistics Asociaci3n Espa3ola de Ling3stica Aplicada AESLA for work by experienced researchers. **Common Ground in First Language and Intercultural Interaction** Istvan Kecskes, 2023-03-06 In recent years the traditional approach to common ground as a body of information shared between participants of a communicative process has been challenged. Taking into account not only L1 but also intercultural interactions and attempting to bring together the traditional view with the egocentrism-based view of cognitive psychologists it has been argued that construction of common ground is a dynamic

emergent process It is the convergence of the mental representation of shared knowledge that we activate assumed mutual knowledge that we seek and rapport as well as knowledge that we co construct in the communicative process This dynamic understanding of common ground has been applied in many research projects addressing both L1 and intercultural interactions in recent years As a result several new elements aspects and interpretations of common ground have been identified Some researchers came to view common ground as one component in a complex contextual information structure Others analyzing intercultural interactions pointed out the dynamism of the interplay of core common ground and emergent common ground The book brings together researchers from different angles of pragmatics and communication to examine i what adjustments to the notion of common ground based on L1 communication should be made in the light of research in intercultural communication ii what the relationship is between context situation and common ground and iii how relevant knowledge and content get selected for inclusion into core and emergent common ground **Handbook on In-Work**

Poverty Henning Lohmann,Ive Marx,2018-01-26 There has been a rapid global expansion of academic and policy attention focusing on in work poverty acknowledging that across the world a large number of the poor are working poor Taking a global and multi disciplinary perspective this Handbook provides a comprehensive overview of current research at the intersection between work and poverty Celtic Tiger in Collapse Peadar Kirby,2010-02-17 Since the first edition there have been fundamental changes in the Irish growth model The sudden collapse of the Irish economy in 2008 raises questions such as why the sudden and deep decline in economic growth What are the prospects for a return to growth Answering these questions and more this book is the definitive work on the Celtic Tiger **California.
