Nonlinear Analysis And Optimization:

Nonlinear Analysis Qamrul Hasan Ansari, 2014-06-05 Many of our daily life problems can be written in the form of an optimization problem. Therefore, solution methods are needed to solve such problems. Due to the complexity of the problems, it is not always easy to find the exact solution. However, approximate solutions can be found. The theory of the best approximation is applicable in a variety of problems arising in nonlinear functional analysis and optimization. This book highlights interesting aspects of nonlinear analysis and optimization together with many applications in the areas of physical and social sciences including engineering. It is immensely helpful for young graduates and researchers who are pursuing research in this field as it provides abundant research resources for researchers and post doctoral fellows. This will be a valuable addition to the library of anyone who works in the field of applied mathematics, economics, and engineering.

Recent Advances in Nonlinear Analysis and Optimization with Applications Savin Treanță, 2020-09-30 This book focuses on recent advances in nonlinear analysis and optimization with important applications drawn from various fields such as artificial intelligence, genetic algorithms, optimization problems under uncertainty, and fuzzy logic. Specifically, it is devoted to nonlinear problems associated with optimization which have some connection with applications. The ideas and techniques developed here will serve to stimulate further research in this dynamic field and in this way the book will become a valuable reference for researchers, engineers, and students in the field of mathematics, management science, operations research, optimal control science, and economics.

Nonlinear Analysis and Optimization Alfred Auslender, 1987 This study collects the papers presented at the Nonlinear Analysis and Optimization conference held at the Center for Operations Research and Econometrics CORE in Louvain la Neuve, Belgium. It was the firm belief of the organizers of the meeting that there is a natural interaction between the methods used in nonlinear analysis and the problems encountered in optimization and that gathering the papers into one book would be beneficial for both parties concerned. The papers are mainly concerned with the following themes: nonlinear analysis, sensitivity, stability, analysis, and algorithms in nonlinear programming for smooth, nonsmooth, and global problems.
