Nonlinear Commutators in Interpolation Theory Nigel John Kalton, 1988 **Nonlinear Commutators in Interpolation Theory** Nigel J. Kalton, Nigel John Kalton, 1988-12-31 **Harmonic Analysis and Operator Theory** Stefania A. M. Marcantognini, 1995 The collection covers a broad spectrum of topics including wavelet analysis Haenkel operators multimeasure theory the boundary behavior of the Bergman kernel interpolation theory and Cotlar's Lemma on almost orthogonality in the context of L^p spaces and more Handbook of the Geometry of Banach Spaces, 2003-05-06 *Handbook of the Geometry of Banach Spaces* *Handbook of the Geometry of Banach Spaces* William B. Johnson, Joram Lindenstrauss, 2001 The Handbook presents an overview of most aspects of modern Banach space theory and its applications The up to date surveys authored by leading research workers in the area are written to be accessible to a wide audience In addition to presenting the state of the art of Banach space theory the surveys discuss the relation of the subject with such areas as harmonic analysis complex analysis classical convexity probability theory operator theory combinatorics logic geometric measure theory and partial differential equations The Handbook begins with a chapter on basic concepts in Banach space theory which contains all the background needed for reading any other chapter in the Handbook Each of the twenty one articles in this volume after the basic concepts chapter is devoted to one specific direction of Banach space theory or its applications Each article contains a motivated introduction as well as an exposition of the main results methods and open problems in its specific direction Most have an extensive bibliography Many articles contain new proofs of known results as well as expositions of proofs which are hard to locate in the literature or are only outlined in the original research papers As well as being valuable to experienced researchers in Banach space theory the Handbook should be an outstanding source for inspiration and information to graduate students and beginning researchers The Handbook will be useful for mathematicians who want to get an idea of the various developments in Banach space theory **Nonlinear Differential Forms** Tadeusz Iwaniec, 1998 **Nigel J. Kalton Selecta** Fritz Gesztesy, Gilles Godefroy, Loukas Grafakos, Igor Verbitsky, 2016-07-05 This book is the first part of a two volume anthology comprising a selection of 49 articles that illustrate the depth breadth and scope of Nigel Kalton's research Each article is accompanied by comments from an expert on the respective topic which serves to situate the article in its proper context to successfully link past present and hopefully future developments of the theory and to help readers grasp the extent of Kalton's accomplishments Kalton's work represents a bridge to the mathematics of tomorrow and this book will help readers to cross it Nigel Kalton 1946-2010 was an extraordinary mathematician who made major contributions to an amazingly diverse range of fields over the course of his career Function Spaces, Interpolation Spaces, and Related Topics Michael Cwikel, Yoram Sagher, 1999 This volume presents the proceedings of the international workshop held at the Technion Israel Institute of Technology Included are research and survey articles on interpolation theory and function spaces **Holomorphic Spaces** Sheldon Jay Axler, John E.
