*Human Behavior Understanding* Albert Ali Salah, Theo Gevers, Nicu Sebe, Alessandro Vinciarelli, 2010-08-19 It was a great pleasure to organize the First International Workshop on Human Behavior Understanding HBU which took place as a satellite workshop to International Conference on Pattern Recognition ICPR on August 22 2010 in Istanbul Turkey. This workshop arose from the natural marriage of pattern

recognition with the rapidly advancing area of human behavior analysis. Our aim was to gather researchers dealing with the problem of modeling human behavior under its multiple facets expression of emotions display of relational attitudes performance of individual or joint actions etc with particular attention to pattern recognition approaches that involve multiple modalities and those that model actual dynamics of behavior. The contiguity with ICPR one of the most important events in the pattern recognition and machine learning communities is expected to foster cross pollination with other areas for example temporal pattern mining or time series analysis which share their important methodological aspects with human behavior understanding. Furthermore the presence of this workshop at ICPR was meant to attract researchers in particular PhD students and postdoctoral researchers to work on the questions of human behavior understanding that is likely to play a major role in future technologies ambient intelligence human robot interaction artificial social intelligence etc as witnessed by a number of research efforts aimed at collecting and annotating large sets of multi sensor data collected from observing people in natural and often technologically challenging conditions
