Eckhart,2021-05-02 55% OFF for Bookstores NOW at 15.29 instead of 33.97 LAST DAYS Have you ever wondered how building a habit is correlated to Emotional Intelligence? It is commonly said that it takes 21 days to make a habit stick. With that in mind, each skill will take several weeks to ingrain in your mind and body, and that is only if you practice them every single day. Fortunately, you can work on several skills at a time. There will be plenty of opportunities every day that you can apply your new emotional intelligence tools to, and many of these opportunities allow you to practice more than one skill. Others are more situational and it could take even longer before you have the opportunity to really work on them. For example, practicing cultural social awareness is going to be based on how often you are exposed to other cultures. If you are feeling overwhelmed or think that it is downright impossible, break it down into a step-by-step plan for yourself. Rather than focus on the overall goal and the big picture, try setting smaller goals for yourself. The best way to set a goal is to write down your overall goal, for example, increasing your chances of success. Then you will want to write down three steps to take in order to reach that goal, such as improving EQ, getting a better job, establish a long-term romantic relationship. Once you have your three steps written out, break each of them into three smaller steps. This book covers EQ Skills That Will Help Your Career.
