Multidisciplinary Perspectives On Aging:

Multidisciplinary Perspectives on Aging Lynn M. Tepper, MA, MS, EDM, EdD, Thomas M. Cassidy, MAg, 2004-09-28 In this multidisciplinary text noted leaders from a variety of fields provide students and professionals with a big picture approach to the best possible care for today's growing aging population. Addressing the extensive concerns that have arisen out of an increased life expectancy and the elder boom of aging baby boomers the contributors point to changing care and housing needs health mental health and wellness concerns and financial ethical and legal issues in elder care. Contributors include Eileen Chichin Catherine DeLorey Marshall Kapp Gary Kennedy William Smith Patricia Miller and Thomas Campbell Jackson

Aging and Time Henk Visser, Jan Baars, 2020-11-25 The aim of this volume is to revitalise the debate about the concepts of time implicit in the study of aging. The many problems related to aging and the aged put an enormous pressure on the gerontological community to come up with practical applications and solutions. In considering research findings we must keep in mind the basic assumptions that shape and influence even the most obvious statements about aging. In this multidisciplinary volume the contributors take on the important task of exploring real issues concerning temporal concepts and approaches to aging and the concepts of time that are used in thinking about aging determine to a large extent the way aging is approached. Most studies of aging still use a chronological approach to define populations for research purposes that is to determine which aged should be studied and to establish how people's characteristics social economic health and so forth change as a function of age. This approach may lead to an accumulation of data but does not in itself lead to explanatory knowledge. The step from chronological time to chronological age should be taken cautiously if we want to consider aging processes seriously especially because chronological age is widely used in contemporary societies as a basis for regulating all kinds of processes with many consequences for individuals. The arguments presented here do not deny the finitude of human life nor do they deny that aging can be observed in any individual if we compare the characteristics of that person over a relatively long period. The question is how to approach these themes to get a better understanding. To achieve this we need to understand the specific significance and relativity of chronological time and uncover unfounded deductions about time in relation to aging. This book will be of interest to students and professors of the social sciences humanities and aging including the methodology of aging studies professionals working in the field of aging including sociologists psychologists and biologists

Human Ageing and Later Life Anthony M Warnes, 1989 *Quality of Life in Old Age* Heidrun Mollenkopf, Alan Walker, 2007-06-13 This book started its life during a symposium we organised on Quality of Life in Old Age at the Fifth Conference of the International Society for Quality of Life Studies ISQOLS in Frankfurt in July 2003. We are extremely grateful to Alex Michalos for sponsoring that session encouraging us to use the symposium presentations as the basis for a book and for his support during the commissioning and editing process. We are also very grateful to the authors of this volume for the prompt delivery of their manuscripts and responses to our editorial comments. Finally our special thanks

to Marg Walker for her expert and efficient preparation of the manuscript for publication Heidrun Mollenkopf Alan Walker Heidelberg ix SECTION I UNDERSTANDING QUALITY OF LIFE IN OLD AGE ALAN WALKER AND HEIDRUN MOLLENKOPF 1 INTERNATIONAL AND MULTIDISCIPLINARY PERSPECTIVES ON QUALITY OF LIFE IN OLD AGE Conceptual issues Quality of life QoL is a multidimensional holistic construct assessed from many different perspectives and by many disciplines Moreover the concept of QoL can be applied to practically all important domains of life Thus QoL research has to include social environmental structural and health related aspects and be approached from an interdisciplinary perspective This holds even more when QoL in old age is the focus because ageing itself is a multidimensional process **Aging and later life: multidisciplinary perspectives** A. M. Warnes, Social Gerontology Nancy R. Hooyman,H. Noguchi, 2001 *Identity and Ageing* Mark Cameron Tennant, 2025-08-29 Examining the fundamental social and cultural changes faced by older adults this book explores ageing and the psychological issues encountered in learning to be as an older person Many of these issues are present throughout the lifespan but take on a new complexion with advancing age such as the significance of past present and future in our lives how we relate to others in our world the impact of our gendered lives the tension between autonomy and dependence consumption and production cognition and emotion and the psychological impact of biological ageing Adopting a lifespan developmental approach this text draws together the psychology of late adulthood contemporary views about identity and how we learn and develop in late adulthood

Acknowledging the historical social cultural biological and technological factors that impact the psychological experience of identity as we age this book will be of interest to psychology and social work students studying lifespan development It will also appeal more broadly to a range of professions that provide services for older adults

Successful Ageing, Spirituality and Meaning

Johan Bouwer, 2010 After more than forty years of studying the subject matter of successful ageing defining it from perspectives like dependence or psychological and physiological vitality scholars have only at the end of the nineties made a specific connection between successful ageing and spirituality This sparked off an increase in spirituality or aspects of gerotranscendence with age in quite a number of studies Considering spirituality and or meaning and the ongoing discussion about the predictors of successful ageing and activities associated with the baby boom generation form the background to the articles bundled in this collection The single thread running through this collection is that the inclusion of spirituality as an anthropological structure of humankind repels reductionism in both the study of the subject matter and the care for elderly people and opts for a moral position keeping respect and humanity in mind The fourteen articles are thematically classified into seven categories The categories reflect apart from the conceptualisation of the two key concepts running through this book the following perspectives gerontological psychological sociological anthropological moral and theological perspectives The authors explore the two tiered theme of successful ageing and spirituality from different angles and make an interesting and challenging contribution to the existing corpus of publications in this field Fundamental motives identified in the articles refer to the need of balance in looking for the essence of ageing successfully combining life span motives with care considering culture as a very important parameter and to exploring mental health in relation to theological anthropology
