Multimodal Video Characterization And Summarization:

Multimodal Video Characterization and Summarization Michael A. Smith, Takeo Kanade, 2004-10-20 Multimodal Video Characterization and Summarization is a valuable research tool for both professionals and academicians working in the video field. This book describes the methodology for using multimodal audio, image and text technology to characterize video content. This new and groundbreaking science has led to many advances in video understanding such as the development of a video summary. Applications and methodology for creating video summaries are described as well as user studies for evaluation and testing.

Wittgenstein and Artificial Intelligence, Volume II Alice C Helliwell, Alessandro Rossi, Brian Ball, 2024-09-10 Volume II This collection brings together work on the relevance of Wittgenstein's philosophy to the field of Artificial Intelligence AI. Over two volumes our contributors cover a wide range of topics from different disciplinary approaches. In this Volume II contributions are centred on two major themes in the philosophy of AI: questions of value and governance. Contributions include chapters on both ethics and aesthetics and AI as well as questions of the governance of AI systems including legal and policy issues.

Encyclopedia of Multimedia Technology and Networking, Second Edition Pagani, Margherita, 2008-08-31 Advances in hardware, software and audiovisual rendering technologies of recent years have unleashed a wealth of new capabilities and possibilities for multimedia applications, creating a need for a comprehensive up-to-date reference. The Encyclopedia of Multimedia Technology and Networking provides hundreds of contributions from over 200 distinguished international experts covering the most important issues, concepts, trends and technologies in multimedia technology. Machine Learning for Big Data Analysis Siddhartha Bhattacharyya, Hrishikesh Bhaumik, Anirban Mukherjee, Sourav De, 2018-12-17 This volume comprises six well-versed contributed chapters devoted to report the latest findings on the applications of machine learning for big data analytics. Big data is a term for data sets that are so large or complex that traditional data processing application software is inadequate to deal with them. The possible challenges in this direction include capture, storage, analysis, data curation, search, sharing, transfer, visualization, querying, updating, and information privacy. Big data analytics is the process of examining large and varied data sets i.e. big data to uncover hidden patterns, unknown correlations, market trends, customer preferences and other useful information that can help organizations make more informed business decisions. This volume is intended to be used as a reference by undergraduate and post-graduate students of the disciplines of computer science, electronics and telecommunication, information science and electrical engineering. THE SERIES FRONTIERS IN COMPUTATIONAL INTELLIGENCE The series Frontiers In Computational Intelligence is envisioned to provide comprehensive coverage and understanding of cutting edge research in computational intelligence. It intends to augment the scholarly discourse on all topics relating to the advances in artificial life.

and machine learning in the form of metaheuristics approximate reasoning and robotics Latest research findings are coupled with applications to varied domains of engineering and computer sciences This field is steadily growing especially with the advent of novel machine learning algorithms being applied to different domains of engineering and technology The series brings together leading researchers that intend to continue to advance the field and create a broad knowledge about the most recent research
