Multiresolution Image Processing And Analysis:

Multiresolution Image Processing and Analysis A. Rosenfeld, 2013-03-09 This book results from a Workshop on Multiresolution Image Processing and Analysis held in Leesburg VA on July 19-21, 1982. It contains updated versions of most of the papers that were presented at the Workshop as well as new material added by the authors. Four of the presented papers were not available for inclusion in the book: D. Sabbah, A computing with connections approach to visual recognition; R. M. Haralick, Fitting the gray tone intensity surface as a function of neighborhood size; E. M. Riseman, Hierarchical boundary formation; and W. L. Mahaffey, L. S. Davis and J. K. Aggarwal, Region correspondence in multi-resolution images taken from dynamic scenes. The number and variety of papers indicates the timeliness of the Workshop. Multiresolution methods are rapidly gaining recognition as an important theme in image processing and analysis. I would like to express my thanks to the National Science Foundation for their support of the Workshop under Grant MCS 82-05942 to Barbara Hope for organizing and administering the Workshop to Janet Salzman and Fran Cohen for retyping the papers and above all to the speakers and other participants for making the Workshop possible.
