Kabuki's Forgotten War James R. Brandon, 2008-10-31 According to a myth constructed after Japan's surrender to the Allied Forces in 1945 kabuki was a pure classical art form with no real place in modern Japanese society In *Kabuki's Forgotten War* senior theater scholar James R Brandon calls this view into question and makes a compelling case that up to the very end of the Pacific War kabuki was a living theater and as an institution an

active participant in contemporary events rising and falling in consonance with Japan's imperial adventures. Drawing extensively from Japanese sources—books, newspapers, magazines, war reports, speeches, scripts, and diaries—Brandon shows that kabuki played an important role in Japan's Fifteen Year Sacred War. He reveals, for example, that kabuki stars raised funds to buy fighter and bomber aircraft for the imperial forces and that producers arranged large-scale tours for kabuki troupes to entertain soldiers stationed in Manchuria, China, and Korea. Kabuki playwrights contributed no less than 160 new plays that dramatized frontline battles or rewrote history to propagate imperial ideology. Abridged by censors molded by the Bureau of Information and partially incorporated into the League of Touring Theaters, kabuki reached new audiences as it expanded along with the new Japanese empire. By the end of the war, however, it had fallen from government favor and in 1944–1946 it nearly expired when Japanese government decrees banished leading kabuki companies to minor urban theaters and the countryside. *Kabuki's Forgotten War* includes more than a hundred illustrations, many of which have never been published in an English language work. It is nothing less than a complete revision of kabuki's recent history and, as such, goes beyond correcting a significant misconception. This new study remedies a historical absence that has distorted our understanding of Japan's imperial enterprise and its aftermath.

Bridging the Gap Between AI, Cognitive Science, and Narratology With Narrative Generation Ogata, Takashi, Ono, Jumpei, 2020-09-25. The use of cognitive science in creating stories, languages, visuals, and characters is known as narrative generation, and it has become a trending area of study. Applying artificial intelligence (AI) techniques to story development has caught the attention of professionals and researchers; however, few studies have inherited techniques used in previous literary methods and related research in social sciences. Implementing previous narratology theories to current narrative generation systems is a research area that remains unexplored. *Bridging the Gap Between AI, Cognitive Science, and Narratology With Narrative Generation* is a collection of innovative research on the analysis of current practices in narrative generation systems by combining previous theories in narratology and literature with current methods of AI. The book bridges the gap between AI, cognitive science, and narratology with narrative generation in a broad sense, including other content generation such as novels, poems, movies, computer games, and advertisements. The book emphasizes that an important method for bridging the gap is based on designing and implementing computer programs using knowledge and methods of narratology and literary theories. In order to present an organic, systematic, and integrated combination of both the fields to develop a new research area, namely post-narratology, this book has an important place in the creation of a new research area and has an impact on both narrative generation studies, including AI and cognitive science, and narrative studies, including narratology and literary theories. It is ideally designed for academicians, researchers, and students, as well as enterprise practitioners, engineers, and creators of diverse content generation fields such as advertising, production, computer game creation, comic and manga writing, and movie production.
