New Perspectives On Social Class And Socioeconomic Development In The Periphery:

New Perspectives on Social Class and Socioeconomic Development in the Periphery Nelson Keith, Novella Keith, 1988-03-25 This provocative new volume focuses on the economic features that make Third World social formations distinctive and on non property characteristics such as religion ethnicity and culture that are central to the survival of these societies Specifically the authors look at the significance and revolutionary potential of peasant majorities who take limited advantage of capitalist modes of production and often manage to maintain their cultural and economic identity and a degree of independence in the process Following the editors introduction which explains the conceptual framework for the study the historical and structural causes for the weakness of the basic capitalist classes in the periphery the underdeveloped national regions are examined The next several chapters deal with the evolution of classes and institutions in the periphery the articulation of peasantries within capitalist and socialist societies and the reasons for the resilience of peasant modes of production Other topics discussed are the role of the state capitalist of socialist in class formation the relationship between the socialist state and the peasantry variables in social transformation in the periphery and the place of the urban poor in Third World development *Inequality, Socio-cultural Differentiation and Social Structures in Africa* Dieter Neubert, 2019-06-25 This book contends that conventional class concepts are not able to adequately capture social inequality and socio cultural differentiation in Africa Earlier empirical findings concerning ethnicity neo traditional authorities patron client relations lifestyles gender social networks informal social security and even the older debate on class in Africa have provided evidence that class concepts do not apply yet these findings have mostly been ignored For an analysis of the social structures and persisting extreme inequality in African societies and in other societies of the world we need to go beyond class consider the empirical realities and provincialise our conventional theories This book develops a new framework for the analysis of social structure based on empirical findings and more nuanced approaches including livelihood analysis and intersectionality and will be useful for students and scholars in African studies and development studies sociology social anthropology political science and geography *The Brazilian Popular Church and the Crisis of Modernity* Manuel A. Vasquez, 1998 This 1997 study explores one of the most dramatic current interactions between religion and politics the development of progressive Catholicism in Latin America In particular it examines economic social and religious obstacles to progressive theology in Brazil This popular church built a utopian vision of social emancipation drawing on Catholic social thought humanistic Marxism and existentialism It was a major democratizing force as Brazil emerged from dictatorship in the late 1970s In the 1980s however the popular appeal of progressive Catholicism came under threat Focusing on a Catholic community near Rio de Janeiro Manuel A Vasquez s incisive study shows how economic and political changes have affected religious practices and argues that the plight of progressive Catholicism in Brazil forms part of a wider crisis of modernity and of humanist discourses **Poverty and Income Distribution in Latin America** George Psacharopoulos, 1997-01-01

Highly empirical analysis documents increase in poverty and worsening of income distribution during 1980s Demonstrates that low levels of education increase incidence of poverty and income inequality Data provided for individual countries Valuable data reference source Handbook of Latin American Studies v 57 **Historical Dictionary of Sierra Leone**

Magbaily C. Fyle, 2006-03-27 Sierra Leone was founded albeit under British control with the highest hopes of being a refuge for liberated Africans and freed slaves When the country received its independence hopes for the future grew even stronger Alas its expectations came crashing down when the country's situation grew steadily worse after repeated military interventions and a devastating ten year civil war that raged throughout the 1990s Now that the war is over there is once again renewed cause for optimism about the country's future as Sierra Leone becomes an active participant in African and world affairs This new edition is based primarily on recent research on the country but covers the earliest known inhabitants the colonial era and the period of independence including the very confusing turmoil of the recent past The chronology briefly traces its history and the introduction provides an essential overview of all the recent developments in the country Hundreds of cross referenced dictionary entries describe significant leaders events political parties and movements ethnic groups and related political economic and social aspects A bibliography is included to facilitate further research *In the Shadow of History* Andrew Davidson, 2018-01-16 The spread of modernity throughout the non Western world has had transformative effects not only on governments and economies but on the lives of individuals as well The constraints and opportunities of modernization inevitably lead to the breakdown and supplanting of older social relations and livelihoods In this volume Andrew P Davidson examines the Nuba Mountain region of western Sudan to show how individuals and families struggle to maintain or expand their well being in the face of continuous uncertainty when control of their destinies is increasingly slipping out of the comforting confines of the village As in many third world regions changes in agriculture and market activity have occurred in the Nuba mountains in a far more compressed time frame than in Europe Davidson charts the social effects of the rationalization process by concentrating on the household as a mediating structure between the individual and the larger society In his analysis the livelihood strategies of households act as a microcosm for the unevenness of development that is characteristic of modernizing economies Davidson offers a comparative and historical examination of economic life in three villages in order to better understand the capacities and limitations that ultimately condition what people can and cannot do He shows how the older lineage system based on communalism kinship and age based hierarchy is being displaced by new forces of social organization and individual orientation which have eroded village cohesion and left the Nuba vulnerable to the Islamic dominated government in Khartoum and the ravages of the continuing Sudanese civil war In its combination of empirical analysis ethnographic fieldwork and theoretical inquiry *In the Shadow of History* reconceptualizes development in such a way that the dynamics of historical transformation are made clear This study in the classic anthropological tradition will be a valuable resource for anthropologists economists historians and Africa area

American Book Publishing Record, 2003 **Radical Institutionalism** William M. Dugger, 1989-04-04 This collection of original essays makes a unique contribution to both the radical and institutionalist economics literature by explicitly identifying and promoting the radical dimension of institutional economics According to the authors Young Turks in the institutionalist school radical institutionalism studies show how resources and wants are created through social processes and advance the struggle for a better world through an ongoing dialogue about economic rights This collection contains a number of new and important contributions from young institutionalists including the first serious treatment of the origins and contributions of the Texas School of institutionalism It also contains thorough discussions of the research agenda for institutional economics and an extensive dialogue between institutionalism and Marxism The book opens with an explanation of the central concepts of radical institutionalism a history of the seminal Texas School of Economics and a discussion of the methodology of radical institutionalism Other contributors critique institutionalism as a radical system of inquiry extend institutionalism beyond its original American foundation discuss the contemporary critical literature and outline the usefulness of a continued dialogue between radical institutionalism and Marxism This provocative collection will interest scholars of contemporary economic theory It could also be used as a supplementary reader in courses on the history of economic thought and political economy **Windows on a New World** Joseph Finkelstein, 1989-03-13 The First Industrial Revolution of the eighteenth century brought fundamental changes in the allocation of people resources and energy In the Second Industrial Revolution the revolutionary impact of automobiles photography electric power and industrial chemicals made the United States a foremost world power The Third Industrial Revolution begins with the information revolution

brought about by the computer Each decade since World War II has brought crucial developments in the areas of CAD CAM fiber optics lasers holography biogenetics bioagriculture and telecommunications The synergy of these new scientific industrial areas will change our way of life for the next five decades and beyond Windows on a New World attempts to integrate some of these outstanding changes Nine chapters each written by a specialist in the field deal with the most important topics relevant to microprocessors lasers telecommunications manufacturing management biotechnology and biophysics Throughout the volume other important areas are mentioned such as holography bioagriculture ceramics and superconductors Each contribution shapes the basic science of the subject and then goes beyond to raise pertinent questions and suggest reverberations The work ends with an overview of the consequences of these changes Finkelstein's thesis is that the United States richly endowed by nature fashioned through its history and people the most successful economy the world has known At the end of the nineteenth century it put into place both a private and an academic structure that gave it preeminence in the world of industrial product development That world is changing It is being rebuilt and restructured by new and incredibly important breakthroughs Change and uncertainty are our constant companions For those who see this as negative and frightening he argues that the industrial revolutions of the past lifted the world from poverty and offered new opportunities for millions of people If this is the end of an era it is also the beginning of a new one A study that broadens our understanding of a complex series of developments this extraordinary work will be read with interest by economists politicians scientists historians and all others involved in the fields of business and technology **Etudes Mandé**, 1999

Power From the Appalachians Frank J. Calzonetti, 1989-07-10 This book grew out of a study that was commissioned by the West Virginia University Energy and Water Research Center It was designed to assess the impact of electricity imports on West Virginia's economy and to determine what efforts if any should be made to increase electricity exports Because organizations involved in the electricity industry operate on the multi state level the outcome is a work that considers the electricity trade from the Appalachians to the Northeast and the physical political geographic and economic factors influencing this trade now and in the future Early chapters provide an introduction to and overview of the American electricity industry Twenty years ago energy forecasters predicted that electricity demand would grow at a healthy rate and that the only way to satisfy future demand was to build new and usually larger power plants Little if any thought was given to electricity conservation alternatives to centralized power plants or changing demand patterns This mentality brought disaster to many utility companies that ordered unnecessarily expensive power plants Recent thinking dictates that the nation has sufficient generating supply conservation can reduce the need for power plants and those plants that are needed can be smaller locally sited facilities This perception is quickly changing the authors contend as certain regions are now in a dangerous position because energy demand is increasing and existing capacity is aging The balance of the book discusses the steps that must be taken to insure cost effective use of electricity and the addition of new supplies Among the issues

considered are the power trade alternative the economic impacts of the electricity industry using West Virginia as a test case acid rain Canadian power imports siting energy facilities and the cost effectiveness of the various strategies Given the diverse backgrounds of the coauthors this book will have widespread appeal in the fields of economics electrical engineering geography mineral resource economics and political science Members of the electrical industry itself should also consider this book as they grapple with guaranteeing the nation s energy supply into the next century
