New Waterfront:

The Future of New York City's Waterfront New York (N.Y.). City Council. Legislative Panel on Waterfront Development, Stephen DiBrienza, 1989 **The New York Waterfront** Mary Beth Betts, 1997 Created by a team of architects historians teachers and students The New York Waterfront is an unprecedented documentation of the rise and fall of the waterfront s architectural technological industrial and commercial existence over the past 150 years This densely illustrated book vividly presents and preserves the waterfront s development Superb watercolor ink and pencil drawings some specially created for this publication as well as rare historic pictures aerial photographs and maps culled from a wide variety of sources and reproduced here for the first time make this book the most comprehensive study on the subject Newly commissioned photographs by Stanley Greenberg supplement this already rich array of images often bringing out the melancholy beauty of the waterfront in its present derelict state Also seen here are many major modern sites the Red Hook Water Pollution Control Plant the Port Authority Grain Elevators the Fresh Kills Landfill and the Brooklyn Navy Yard capturing the nameless inhospitable tracts whose only landmarks are the rusting remains of a once vital commercial life This illustrative material together with a series of informative texts written by critics and scholars reveals a complete picture of the New York waterfront through contemporary projects and visionary proposals environmental plans and master planning built and unbuilt waterfront structures pier warehouses recreation piers markets and ferry terminals in addition to a meticulous analysis of a variety of documents and records The New York Waterfront offers a unique perspective on waterfront building so that the lessons of the past can inform decisions about the future This publication also inspires us to strive for an equivalent greatness when designing the urban fabric of the twenty first century the kind of greatness in public works that has in the past distinguished New York City Beyond the Edge Raymond Gastil, 2002-10-25 Through an insightful look at projects from around the world and at the current design proposals for New York itself the author paints a portrait of redevelopment that is both pragmatic and visionary one that holds the promise of reconnecting New Yorkers to their waterfront as a vital place of work and of public life **BOOK JACKET New York City Waterfront Revitalization Program** New York (N.Y.). inflow of people attempting to find a better life particularly in Northwest Europe and the UK which has had an impact on the maritime domains of European ports While there has been attention paid to the role of maritime policing by scholars in maritime security studies little attention has been paid by criminologists and policing studies scholars This book aims to fill this gap Bringing together a range of international scholars this book covers a variety of topics pertinent to maritime crime and its policing such as fraud piracy and armed robbery at sea illegal and unregulated fishing smuggling people trafficking illegal immigration illegal dumping and pollution arms trafficking terrorism and cargo theft It brings together new perspectives on several key criminological themes such as transnational organised crime criminalisation and securitisation and provides a bold new direction for the landlocked discipline of criminology and policing studies An accessible and compelling read this book will be of interest to students and scholars of criminology policing sociology politics migration studies and all those interested in the policing of the sea *Minutes, and Do Not Include the Annual Report*, 1907 **The**
