Hennessy,Richard O'Brien,2013-11-11 for many years been heavily dependent on bank financing and this situation has not changed fundamentally In his paper on stock exchange governance in the European Union Guido Ferrarini discusses the relative merits of member and investor ownership and compares stock exchange regulation in a number of EU countries

Faced with increasing competition amongst themselves and against other enterprises that offer transaction services such as proprietary trading systems it is essential for European stock exchanges to improve their efficiency and to generate volume Large investments in new information technology are necessary in order to preserve competitiveness in a global financial market The implementation of the ISD has accelerated cross border transaction activity of member firms and investors and strengthened the pressure for convergence of national stock exchange laws in the EU In their paper Francesco Giavazzi and

Marco Battaglini look at the role played by banks in privatization processes Banks can be involved in such processes in several ways They may themselves be the objects of privatization since in many countries a significant fraction of the banking industry is publicly owned This is the case in France Spain and Italy But banks can also be important buyers of the equity of industrial firms sold by the government if they are allowed to do so The authors characterize privatizations as a very good opportunity to set up the right environment for the development of new financial intermediaries and in general for a sound corporate governance system **Extending the Boundaries in the New Financial Landscape** Zeti Akhtar Aziz (Tan Sri.),2006

China's Financial Interlinkages and Implications For Inter-Agency Coordination Min Liao,Tao Sun,Jinfan Zhang,2016-09-07 China's financial system has become very large diversified and interconnected This changing financial landscape could potentially produce systemic risks arising primarily from growing financial interconnectedness The paper argues that to address the potential systemic risks Chinese authorities should further strengthen internal coordination notably by institutionalizing better information collection and sharing among regulators as well as enhancing coordinated and comprehensive analysis of systemic risk Essays on the New Financial Landscape Peter Zimmerman,2019 Mexico,1993
