Remapping Energopolitics Abhisek

Ghosal, 2024-06-17 Emerging concerns and contexts of geological thinking seek to bring out how energopolitical interventions into the geokinetic unfolding of the Earth assume new dimensions and directions owing to the complex and evolving intersections between folds and fluxes of energy in the context of oceans. Written in negotiation with the notion of energopolitics articulated by Dominic Boyer. Remapping Energopolitics calls for ruling out any epistemic attempt to structure the rhizomatic movements of energy through the transformations of oceans. Aiming to delve deeper into the complex junctures among energy, ocean and earth. In epistemic ends of Blue Humanities are reworked with the help of geophilosophical reading of some Sri Lankan minor writings and in doing so Remapping Energopolitics makes a series of attempts to reconceptualize energy thinking in line with the differential and deterritorial grammaticalization of Deleuze and Guattarian micropolitics thereby offering a critique of the structured and stratified understandings of energy linkages.

Every one of these frequently cited classic essays has been reworked to bring them up to date with the latest research in Deleuze Studies. Each offers a separate entry into Deleuze's thought together they illuminate the pivotal role the arts play in the political project of inventing a people to come and the broader project of promoting an ecologically viable new earth.
