*40 lessons to get children thinking: Philosophical thought adventures across the curriculum* Peter Worley, 2015-10-31

This is the type of book many teachers will keep on their desk and use the exercises very regularly for me it is up there with Geoff Petty's Evidence Based Teaching and Paul Ginnis's The Teacher's Toolkit as an essential resource. Worley is an excellent clear writer who communicates very complex ideas very well. Francis Gilbert <http://www.francisgilbert.co.uk> teacher teacher trainer and author of 'I'm a Teacher Get Me Out of Here' Inspire your class to think more deeply about curriculum subjects and get them actively taking part in exciting philosophy experiments today. This new book by bestselling author and founder of The Philosophy Foundation Peter Worley is a collection of practical lesson and activity plans to use in the primary classroom to get children thinking philosophically and creatively around different curriculum areas. The sessions called 'thought adventures' use thought experiments, stories and poems to get children discussing and understanding topics more deeply. Each session is explained step by step with everything you need to do and say spelled out and all the equipment you need listed with instructions on how to set up each session. You can implement the sessions in the classroom either as a complete lesson or as an activity within another lesson. All the sessions are tried and tested by Peter and his colleagues at The Philosophy Foundation who work with primary schools on a regular basis.

It provides comprehensive material on how to select and interface to the appropriate locking hardware, typically the most difficult responsibility for access control system designers, installers and end users. Provides a comprehensive understanding of Electronic Access Control (EAC) Systems to readers at any level, novices and experts alike. Helps readers understand concepts for securing a facility while providing transparent access to those who frequently and legitimately enter the facility. Includes expanded information on system configurations, including user data, security access levels, access clearances and groups and system interfaces. Offers all new material on how to interface systems from multiple manufacturers into a single cohesive system.
