Monetary Uncertainty Eduard Jan Bomhoff, 1983 **Monetary Policy under Uncertainty** Oliver Sauter, 2014-01-31 Oliver Sauter analyzes three aspects of monetary policy under uncertainty. First he shows that the terms risk and uncertainty are often wrongly used as synonyms despite their different meanings. The second aspect is the proper examination and incorporation of uncertainty into a monetary policy framework. The author undertakes systematization with a closer look at each identified form of uncertainty. Thirdly he focuses on the quantification of uncertainty from two different perspectives either from a market perspective or from a central bank perspective

Optimal Monetary Policy under Uncertainty, Second Edition Richard T. Froyen, Alfred V. Guender, 2019 This book provides a thorough survey of the model based literature on optimal monetary in a stochastic setting. The survey begins with the literature of the 1970s which focused on the information problem in policy design and extends to the New Keynesian approach of the 1990s which centered on evaluating alternative targeting strategies. World Bank East Asia and Pacific Economic Update, April 2024 World Bank, 2024-04 Most economies in developing East Asia and Pacific EAP are growing faster than the rest of the world but slower than before the pandemic. Slowing global growth, still tight financial conditions and an increase in trade protection and industrial support in large and rich countries are key aspects of the external environment shaping the region's economic performance. Amplified public and private debt constrained macroeconomic policy and increased policy uncertainty are the major domestic issues. EAP's current macroeconomic challenges risk obscuring the microeconomic foundations of longer term growth. Over the last decade EAP's growth has been driven by investment and capital deepening rather than by increased productivity of firms. Now private investment is weak and productivity declining further inhibiting the incentive to invest. Firms are the protagonists of productivity growth. Some of the weaker firms in EAP countries are beginning to catch up with stronger firms. But the stronger firms in the region are failing to take full advantage of new technologies. Regional leaders risk becoming global laggards. Bold policy action to unleash competition improve

infrastructure and reform education with measured state support could revitalize the region's economy
