Monetary Economics, Banking and Policy Penelope Hawkins, Ioana Negru, 2022-12-19. This edited collection seeks to advance thinking on money and the monetary nature of the economy, macroeconomic analysis, and economic policy, setting it within the context of current scholarship and global socioeconomic concerns and the crisis in the economics discipline. A key aim is to highlight the central contribution that Sheila Dow has made to these fields. Bringing together an impressive panel of contributors, this volume explores topics including central bank independence, liquidity preferences, money supply, endogeneity, financial regulation, regional finance, and public debt. The essays in this first collection of two will be thought-provoking reading for advanced students and scholars of macroeconomics, monetary economics, central banking, and heterodox economics. Contributors have a broad range of professional experience at universities, central banks, business development institutions, and policy advisories.
