Money In The Peoples Republic Of China A Comparative Perspective:

Money in the People's Republic of China Gavin Peebles, 1991-01-01 *The Political Economy Of China's Financial Reforms* Paul Bowles, Gordon White, 2019-07-11 THIS PATHBREAKING Work analyzes the evolution of China's financial reforms since 1979. China's reformers have stressed the construction of a more diverse, flexible, and competitive financial system as a crucial element of China's economic reform program. The authors assess the theory and practice of financial reform in light of China's specific characteristics as a large developing country that still claims to be pursuing the goal of establishing a new form of socialist market economy. The authors utilize two approaches. First, they place the overall design and trajectory of financial reform since 1979 within a broad comparative framework of alternative strategies of financial reform and financial systems. Second, they use a political economy perspective to explore the complex interactions among the political and economic actors, individual groups, or institutions that affect reform outcomes. Integrating these two approaches, the authors conclude by assessing future directions for feasible and desirable financial reform in China. The Chinese Economy under Transition Sarah Cook, Shujie Yao, Juzhong Zhuang, 2000-01-28 This wide-ranging collection addresses many important issues in China's economy under transition: from grain production to trade to the development of township enterprises, the restructuring of state-owned enterprises, the emergence of big business, money demand and consumption behaviour. Together, the studies provide insightful analysis and discussion of economic policies illuminating the institutional context within which reform strategies are negotiated and implemented in different economic sectors. **Doctoral Dissertations on China and on Inner Asia, 1976-1990** Patricia Polansky, Anna Leon Shulman, 1998-10-15 A guide to the thesis literature on China and Inner Asia written between 1976 and 1990. Entries are grouped in topical chapters, and each entry includes bibliographic information and an abstract. The Chinese Economy, 1978-1994, 1995 **How China Escaped Shock Therapy** Isabella M. Weber, 2021-05-26 China has become deeply integrated into the world economy. Yet gradual marketization has facilitated the country's rise without leading to its wholesale assimilation to global neoliberalism. This book uncovers the fierce contest about economic reforms that shaped China's path. In the first post-Mao decade, China's reformers were sharply divided. They agreed that China had to reform its economic system and move toward more marketization but struggled over how to go about it. Should China destroy the core of the socialist system through shock therapy, or should it use the institutions of the planned economy as market creators? With hindsight, the historical record proves the high stakes behind the question. China embarked on an economic expansion commonly described as unprecedented in scope and pace, whereas Russia's economy collapsed under shock therapy. Based on extensive research, including interviews with key Chinese and international participants and World Bank officials, as well as insights gleaned from unpublished documents, the book charts the debate that ultimately enabled China to follow a path to gradual
