Money Matters A Critical Look At Bank Architecture:

Money Matters Parnassus Foundation, Museum of Fine Arts, Houston, 1990 *Money Matters* James Borcoman, David Harris, Susan W. Wagg, 1990 **Money Matters** National Gallery of Canada, 1992 *The Architecture of Andrew Thomas Taylor* Susan W. Wagg, 2013 How Andrew Thomas Taylor advanced the quality of architecture in Canada *The American Corporation Today* Carl Kaysen, 1996-10-31 Not since Edward Mason's classic book *The Corporation in Modern Society* appeared in 1959 has anyone compiled an authoritative overview of the American business firm. Such a survey is now clearly overdue for in the last thirty years both the corporation and the business environment has changed radically. In *The American Corporation Today* Carl Kaysen and other leading students of business and markets from around the country provide a much needed analysis of American corporate life at the end of the century. Here is the American corporation from every angle: its postwar history, its relation to the law, its financing, its impact on technological innovation, its role as employer and as political force, and much more. The contributors, all of whom are recognized experts in their fields, not only tackle many of the same key areas that the contributors to Mason's classic study looked at, but they also illuminate issues that have only arisen in recent years. For instance, Raymond Vernon describes the increasing globalization of American business, where the net income from operations outside the U.S. is now nearly half of that from domestic operations, as opposed to one tenth in the 1950s. James Q. Wilson traces how the corporation has become a full-time political actor, showing how it reinvented its political strategy and tactics in the 1960s in the face of a wave of new consumer, environmental, and worker health legislation. Gregory Acs and Eugene Steuerle show how the corporation promotes the commonweal, acting as agent for the employee in purchasing pension, health, and other welfare benefit plans, while Lester Thurow casts a critical eye at the decline of median real wages of American males over the last twenty years, never before have a majority of American workers suffered real wage reductions while the real per capita gross domestic product was increasing. In other pieces, corporate finance experts Charles Calomiris and Carlos Ramirez advocate removing legal constraints on financial institutions that prevent them from providing the full range of business financing, from short-term debt to equity. Michael Useem looks at the rise of education and training as a vexing corporate issue, and Barbara Bergmann discusses the increasingly diverse work force, arguing that ending bias is in the corporation's best interest. And finally, Neil Harris provides a fascinating discussion of architecture, exploring how companies have become the principle patrons of important architecture since the 1950s. Vital to everyone concerned with American big business today, this collection is sure to become the new standard upon which future studies of the corporation will be built.

Contemporary Issues in Branding Pantea Foroudi, Maria Palazzo, 2019-12-06 This book provides students and academics with a comprehensive analysis of the theory and practice of branding. The challenge to explore new and effective ways of harnessing the power of communication to engage with company stakeholders in interactive, immediate, and innovative ways is ever present in the digital era. Digital marketing and social media create

opportunities for managers to communicate their brand's identity to their consumers and stakeholders. Yet limited empirical research exists to elucidate these issues and less still that assists our understanding of branding issues at an international level. Recognising the complexity and plurality at the heart of the branding discipline, this text explores the relationship between brands, identity and stakeholders. Working through building, designing and maintaining a brand, the authors consider such aspects as strategic planning and campaign management, research and measurement, media relations, employee communication, leadership and change communication and crisis branding. Critically differing methods and approaches applied to branding and communication research design are assessed, including both qualitative and quantitative methods. Proposing a mixture of theory and practice with international case studies, this book is an invaluable companion for advanced undergraduate and postgraduate students, academics of marketing and strategic brand management as well as managers and decision makers globally.

Persuasive Imagery Linda M. Scott, Rajeev Batra, 2003-04-02 This volume synthesizes and advances existing knowledge of consumer response to visuals. Representing an interdisciplinary perspective, contributors include scholars from the disciplines of communication psychology and marketing. The book begins with an overview section intended to situate the reader in the discourse. The overview describes the state of knowledge in both academic research and actual practice and provides concrete sources for scholars to pursue. Written in a non-technical language, this volume is divided into four sections. **Image and Response** illustrates the difficulty encountered even in investigating the basic influences, processes and effects of mere exposure to imagery. **Image and Word** presents instances in which the line between words and pictures is blurred, such as the corporate logo which is often pictorial in nature but communicates on an abstract level usually attributed to words. **Image and the Ad** contributes to our appreciation for the exquisite variations among advertising texts and the resultant variability in response, not only to different ads but among different viewers of the same ad. **Image and Object** carries the inquiry of visual response over the bridge toward object interaction. Having traveled a path that has gone from the precise working of the brain in processing visual stimuli all the way to the history of classical architecture, readers of this volume will have a new respect for the complexity of human visual response and the research that is trying to explain it. It will be of interest to those involved in consumer behavior, consumer psychology, advertising, marketing and visual communication.

Design Book Review, 1992 **William Thomas, Architect: 1799-1860** Glenn McArthur, Annie Szamosi, 1996-05-15 Among architect historians, William Thomas is recognized as being one of the founders of the Canadian architectural profession. His prodigious output during a 17-year career in Canada, dating from 1843 to 1860, included over 100 buildings, many of which are still standing today. The significance of Thomas' contribution cannot be overestimated. His buildings became the foci of towns, housing the communities' religious, governmental, educational, commercial and cultural activities. In drawings, prints and photographs of this period depicting Toronto, Quebec City, Hamilton, Halifax, London, Guelph, Chatham and Niagara on the Lake, we can see the direct effects of Thomas' work. His church spires pierce the sky; his public buildings

dominate town blocks often his stores are the most fashionable places to shop and his residential designs are artfully placed within their settings This publication is of special interest not only for the practising architect or historian but with its strong visuals and informal style accessible and entertaining for anyone eager to celebrate our architectural heritage Business Communication, Rhetoric, and architecture: Classical Foundations For Visual Persuasion Rod Parker and H.W.
