Monitoring Evaluation Empower:

Women's Empowerment in Agrifood Governance (WEAGov) Assessment Framework: Insights from the India Pilot Study Ragasa, Catherine, Kyle, Jordan, Yasmin, Sabina, Pande, Harshita, Sharma, Aanshi, Basu, Sampurna, Najjar, Dina, 2025-02-21 Women's equal participation and leadership in political and public life can boost a country's long-term economic growth, foster social inclusion, and help countries reach the 2030 Sustainable Development Goals (SDGs). Beyond these important outcomes, women's inclusion in public life is a basic human right. Women deserve a role in making decisions, controlling resources, and shaping policies. Despite the importance of women's voices and their empowerment in policy and decision-making processes, available metrics show that women's policy and political empowerment remains low. Moreover, these metrics are inadequate in systematically tracking women's voices and empowerment across different levels of decision-making. IFPRI developed an assessment framework, Women's Empowerment in Agrifood Governance (WEAGov), to assess women's voices and empowerment in national policy processes in agrifood systems. This paper presents results from the pilot testing of WEAGov in India from January to March 2024. In this paper, we present how the WEAGov tool works in the Indian context, analyze trends in the data that we collected during the pilot, and provide an overview of the status of women's voices and empowerment in the agrifood policy process as of March 2024. The pilot testing in India provides useful lessons on improving the measurement of these outcomes and offers valuable policy insights on critical entry points for increasing women's voices and empowerment in the national agrifood policy process design, implementation, and evaluation.

Poverty Reduction and Pro-Poor Growth The Role of Empowerment OECD, 2012-04-27 Empowerment of those living in poverty is both a critical driver and an important measure of poverty reduction. This report aims to build donor understanding of empowerment and how best to support it.

The Process of Women's Empowerment Sara Longwe, 2024-09-17 This book begins with a cautionary tale about a development-wide area in rural Zambia with the purpose of lessening the burden of labour on women who previously had to fetch water from faraway streams. The result of the programme was exactly the opposite: it had the actual effect of increasing women's burden of labour. In this book, Longwe and Clarke seek to explain how a more considered approach can avoid such farcical disaster. Central to women's advancement is their own collective participation in the process of recognising and overcoming the instances of systemic gender discrimination which stand in their way. The Longwe Empowerment Framework, which provides the central core of this book, sets out five essential elements of collective action by which women can obtain more control over their own labour and their own lives in a continuous process of increasing collective empowerment. This empowerment process, being self-generative, is seen as being equally as important as the resulting material benefits. Hope Chigudu, a noted feminist and gender consultant, concludes her preface to this book by writing that in a nutshell it offers an analytical framework for identifying the potentially progressive and regressive factors to anticipate at each stage of a women's empowerment programme and how to dance with the power.
