the platform is necessary **DevOps: A Journey from Microservice to Cloud Based Containerization** Hitesh Kumar Sharma, Anuj Kumar, Sangeeta Pant, Mangey Ram, 2024-01-23 Transitioning to DevOps requires a change in culture and mindset At its simplest DevOps is about removing the barriers between two traditionally siloed teams development and operations In some organizations there may not even be separate development and operations teams engineers may do both With DevOps the two teams work together to optimize both the productivity of developers and the reliability of operations They strive to communicate frequently increase efficiencies and improve the quality of services they provide to customers They take full ownership for their services often beyond where their stated roles or titles have traditionally been scoped by thinking about the end customer s needs and how they can contribute to meeting those needs Quality assurance and security teams may also become tightly integrated within these teams Organizations using a DevOps model regardless of their organizational structure have teams that view the entire development and infrastructure lifecycle as part of their responsibilities In this book we introduce the DevOps culture and the tools and techniques under this technical cultural umbrella We explain microservice containers Docker Container Kubernetes etc and the significance of these in adopting the DevOps culture for successful software development **A Developer's Guide to .NET in Azure** Anuraj
