Images of Blood in American Cinema Kjetil

Rødje, 2016-03-09 Through studying images of blood in film from the mid 1950s to the end of the 1960s this path breaking book explores how blood as an audio visual cinematic element went from predominately operating as a signifier providing audiences with information about a film's plot and characters to increasingly operating in terms of affect potentially evoking visceral and embodied responses in viewers. Using films such as *The Return of Dracula* *The Tingler* *Blood Feast* *Two Thousand Maniacs* *Color Me Blood Red* *Bonnie and Clyde* and *The Wild Bunch* R dje takes a novel approach to film history by following one audio visual element through an exploration that traverses established standards for film production and reception. This study does not heed distinctions regarding to genres horror western gangster or models of film production exploitation independent studio productions but rather maps the operations of cinematic images across marginal as well as more traditionally esteemed cinematic territories. The result is a book that rethinks and reassembles cinematic practices as well as aesthetics and as such invites new ways to investigate how cinematic images enter relations with other images as well as with audiences.
