Times Book Review, 1974 **Database of Dreams** Rebecca Lemov, 2015-11-24 Just a few years before the dawn of the digital age Harvard psychologist Bert Kaplan set out to build the largest database of sociological information ever assembled. It was the mid 1950s and social scientists were entranced by the human insights promised by Rorschach tests and other innovative scientific protocols. Kaplan along with anthropologist A I Hallowell and a team of researchers sought out a varied range of non European subjects among remote and largely non literate peoples around the globe. Recording their dreams, stories and innermost thoughts in a vast database, Kaplan envisioned future researchers accessing the data through the cutting edge Readex machine. Almost immediately however technological developments and the obsolescence of the theoretical framework rendered the project irrelevant and eventually it was forgotten.
