**Unreleased Music Vaults** Mason Scott, AI, 2025-02-24 Unreleased Music Vaults explores the intriguing world of lost recordings offering insights into music history and the creative processes behind celebrated artists It delves into why certain tracks never make it to the public ear examining both artistic choices and industry decisions One surprising fact is how much unreleased material exists often providing a more unfiltered glimpse into an artist's experimentation than their official releases Another insight is the complex role of record labels in archiving and sometimes suppressing music impacting our understanding of musical legacies The book adopts a journalistic approach blending research with accessible writing to appeal to music enthusiasts and students of musicology It is structured in three parts beginning with an introduction to unreleased music progressing through case studies of specific artists and genres and concluding with implications for music preservation and copyright law By analyzing bootleg recordings and leaked tracks alongside archival research the book treats unreleased music as an integral part of an artist's creative output deserving study and preservation

**Lost Technologies of Ancient Egypt** Christopher Dunn, 2010-06-24 A unique study of the engineering and tools used to create Egyptian monuments Presents a stone by stone analysis of key Egyptian monuments including the statues of Ramses II and the tunnels of the Serapeum Reveals that highly refined tools and mega machines were used in ancient Egypt From the pyramids in the north to the temples in the south ancient artisans left their marks all over Egypt unique marks that reveal craftsmanship we would be hard pressed to duplicate today Drawing together the results of more than 30 years of research and nine field study journeys to Egypt Christopher Dunn presents a stunning stone by stone analysis of key Egyptian monuments including the statue of Ramses II at Luxor and the fallen crowns that lay at its feet His modern day engineering expertise provides a unique view into the sophisticated technology used to create these famous monuments in prehistoric times Using modern digital photography computer aided design software and metrology instruments Dunn exposes the extreme precision of these monuments and the type of advanced manufacturing expertise necessary to produce them His computer analysis of the statues of Ramses II reveals that the left and right sides of the faces are precise mirror images of each other and his

examination of the mysterious underground tunnels of the Serapeum illuminates the finest examples of precision engineering on the planet Providing never before seen evidence in the form of more than 280 photographs Dunn s research shows that while absent from the archaeological record highly refined tools techniques and even mega machines must have been used in ancient Egypt
