## **Lost Lunar Baedeker:**

The Lost Lunar Baedeker Mina Loy, 1996 There was a time when it was common to couple Mina Loy's name with that of W C Williams or Marianne Moore her advanced contemporaries considered her a literary and artistic genius a descendant of Sappho by way of Emily Dickinson But the public was scandalized by her work and some critics openly scorned it Not only were her Futurist inspired techniques unlike anything most readers had encountered before but her subjects procreation parturition prostitution suicide addiction retardation were considered shocking even by some modernists Mina Loy vanished from the literary scene just as dramatically as she arrived on it and for most of the century her bold experiments have remained a well kept secret But in recent years Loy's work has been discovered by a new generation of poets and critics and has begun to surface in revisionist anthologies What has been needed is a reliable text of the essential Loy poems To assemble The Lost Lunar Baedeker Roger Conover has rescued Loy's poems and prose works from the Dada magazines and other ephemeral publications where they first appeared All of Loy's notorious Futurist and feminist satires are included as are many poems from her Paris and New York periods the complete cycle of Love Songs and several previously unknown texts Detailed notes accompany the text BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

The Last Lunar Baedeker Mina Loy, 1982 **The lost lunar Baedeker** Mina Loy, 2022 A History of Twentieth-Century British Women's Poetry Jane Dowson, Alice Entwistle, 2005-05-19 Publisher Description *Modernism, Technology, and the Body* Tim Armstrong, 1998-02-28 This book is a study of the relations between the body and its technologies in modernism Tim Armstrong traces the links between modernist literary texts and medical psychological and social theory across a range of writers including Yeats Henry James Eliot Stein and Pound Armstrong shows how modernist texts enact experimental procedures which have their origins in nineteenth century psychophysics biology and bodily reform techniques but within a context in which the body is reconceived and subjected to new modes of production representation and commodification Drawing on a wide range of disciplines Armstrong challenges the received oppositions between technology and literature the instrumental and the aesthetic by demonstrating the leaky boundaries and complex interconnections between these domains This book offers a cultural history of modernism as it negotiated the enduring fact

of the human body in a period of rapid technological change      Curious Disciplines Sarah Hayden, 2018-04-15

Foregrounding Loy's critical interrogation of Futurist Dadaist Surrealist and Degenerate artishood and exploring her poetic legacies today *Curious Disciplines* reveals Loy's importance in an entirely novel way      *The Science Fiction of Poetics and the Avant-Garde Imagination* Michael Golston, 2023-11-19

How the tropes of science fiction infuse and inform avant garde poetics and many other kindred arts This insightful playful monograph from Golston does exactly what it advertises modeling poetics based on how poetry and some parallel artistic endeavors has filtered through a century plus of science fiction This is not a book about science fiction in and of itself but it is a book about the resonances of science fiction tropes and ideas in poetic language The germ of Golston's project is a throwaway line in Robert Smithson's *Entropy and the New Monuments* about how cinema supplanted nature as inspiration for many of his fellow artists The movies give a ritual pattern to the lives of many artists and this induces a kind of low budget mysticism which keeps them in a perpetual trance Golston charts how the demotic appeal of sci fi much like that of the B movie cross pollinated into poetry and other branches of the avant garde Golston creates what he calls a regular Rube Goldberg machine of a critical apparatus drawing on Walter Benjamin Roman Jakobson and Gilles Deleuze He starts by acknowledging that per the important work of Darko Suvin to situate science fiction critically the genre is premised on cognitive estrangement But he is not interested in the specific nuts and bolts of science fiction as it exists but rather how science fiction has created a model not only for other poets but also for musicians and landscape artists Golston's critical lens moves around quite a bit but he begins with familiar enough subjects Edgar Rice Burroughs Mina Loy William S Burroughs From there he moves into more alien terrain Ed Dorn's long poem *Gunslinger* the discombobulated work of Clark Coolidge Sun Ra Ornette Coleman and Jimi Hendrix all come under consideration The result of Golston's restless rich scholarship is the first substantial monograph on science fiction and avant garde poetics using Russian Formalism Frankfurt School dialectics and Deleuzian theory to show how the avant garde inherently follows the parameters of sci fi in both theme and form      The Cambridge Companion to Modernist Poetry Alex Davis, Lee M. Jenkins, 2007-07-19

This Companion offers the most comprehensive overview available of modernist poetry its forms its major authors and its contexts The first part explores the historical and cultural contexts and sexual politics of literary modernism and the avant garde The chapters in the second part concentrate on individual authors and movements while the concluding part offers a comprehensive overview of the early reception and subsequent canonisation of modernist poetry As well as insightful readings of canonical poets the Companion features extended discussions of poets whose importance is now being increasingly recognised such as Mina Loy poets of the Harlem Renaissance and postcolonial poets in the Caribbean Africa and India While modernist poets are often thought of as difficult these essays will help students to understand and enjoy their experimental playful and fascinating responses to contemporary social and cultural change and their dialogue with the arts and with each other      *An American Lens* Jay Bochner, 2005

**American Women Writers, 1900-1945** Laurie Champion, Emmanuel Sampath Nelson, 2000-09-30 Profiles nearly sixty American women writers whose most significant works were written or published between 1900 and 1945 describing their lives major works and themes and critical reception and providing primary and secondary bibliographies

*American Experimental Poetry and Democratic Thought* Alan Marshall, 2009 Alan Marshall takes Alexis de Tocqueville's discussion of Some Sources of Poetic Inspiration in Democracies in the second volume of his Democracy in America as the starting point for a wide ranging examination of the nature of democratic thought and expression in American experimental poetry from Walt Whitman and Emily Dickinson in the mid nineteenth century to George Oppen Frank O'Hara and Robert Creeley a century later The book begins by considering the political significance of what Marshall describes as the invisible physiognomy of Whitman's poetry which is followed by a re-evaluation of the flawed republican humanism of Ezra Pound in the light of the thought of Hannah Arendt Other chapters deal with Mina Loy Lorine Niedecker Wallace Stevens William Carlos Williams and Muriel Rukeyser The book argues against the narrowly ideological interpretation of politics that

dominates contemporary literary studies To that extent it recalls Tocqueville's concern to underline the differences between his own methods and perspectives and the historical determinism of his contemporaries Marshall brings together an exceptional variety of theoretical writing including works by Theodor Adorno Seyla Benhabib Stanley Cavell Sigmund Freud Martin Heidegger Immanuel Kant James Madison Karl Marx David Riesman and Donald Winnicott as he seeks to expand and develop Tocqueville's circumspect humanist critical trajectory The chapters are conceived as a series of innovative dialogical constellations to which the close reading of poetry is central The aim throughout is to measure the thought of the poets or their poems against the thoughts of those who are more often called thinkers
