## **Mongolia Country:**

**Mongolia** Robert L. Worden, Andrea Matles Savada, 1991      *From Yuan to Modern China and Mongolia* Morris Rossabi, 2015-01-27 This wide ranging work consisting of selected essays of Morris Rossabi reflects the diverse interests of a leading scholar of China and Inner Asia It encompasses the eras from the thirteenth century to the present territories stretching from China to Mongolia to Central Asia and to the Middle East and religions from Islam to Nestorian Christianity to Judaism and Confucianism in East Central and West Asia Rossabi first challenged the conventional wisdom concerning traditional Chinese foreign relations by showing the pragmatism of Chinese officials who were not bound by Confucian strictures and stereotypes about foreigners and were actually knowledgeable about neighboring regions His studies of the territories surrounding China led to the discovery of a major omission in historical writing the lack of a biography of Khubilai Khan one of the most renowned rulers in Eurasian history His biography of Khubilai resulted in further studies of the Mongolian legacy on global history and of the significant role of women in the Mongolian empire His repeated travels in Mongolia in turn stimulated an interest in modern Mongolia especially the turbulence following the turbulence after the collapse of socialism in 1990 a subject he writes about in this book The need for greater public knowledge and awareness of China Mongolia Central Asia the Silk Roads and Islam in Asia prompted Rossabi to write general occasionally pedagogical articles about these topics for a wider audience      *Mongolia's Economic Prospects* Matthias Helble, Hal Hill, Declan Magee, 2020-06-01 This publication examines Mongolia's recent economic development and outlines reforms that would help the country take advantage of its many opportunities Mongolia is rich in natural resources and although landlocked is well placed to boost trade with its two giant neighbors The country needs to diversify its economy beyond mining enhance economic stability and increase employment To maximize Mongolia's potential the government can improve macroeconomic management enhance the skill base and provide hard and soft infrastructure to promote trade and efficient logistics Governance and institutional reforms are also crucial The government will need to continue to drive reforms so that they are well implemented and deliver the intended change      **National Power and International Geostucture** Daniel Morales Ruvalcaba, Alberto Rocha Valencia, 2024-04-18 This book addresses three innovative aspects for the study of International Relations first proposes a novel theoretical methodological framework for the study of national power and based on this a quantitative analysis technique is formulated that allows us to study the evolution of state power over almost five decades Second states play a fundamental role in the international system which is why the study of their roles in the world cannot be limited to old insufficient and contradictory categorizations Having new categories of states becomes an even more urgent task in the rapidly changing international order than it is today This book proposes nine categories of powers and states that cover all the countries that currently exist Third the international geostucture of world power is proposed which represents a new theoretical notion that helps to explain how the international insertion of states and their possibilities of action are

conditioned by the unequal distribution of national power and by their structural positioning in the international system This book is for all students of International Relations academics and people who want to understand national power as a fundamental factor in relations between countries

Campi, Jagannath Panda, 2021-08-26 This book assesses Mongolia's position in the security calculus of Northeast Asia and presents the policy outlooks of major powers vis a vis the region including the United States Japan China Russia and India Ground breaking and modernistic in its approach the book treats the often marginalised and landlocked small power state of Mongolia as a critical regional actor particularly with regards to managing ties with encircling major powers Russia and China and assist in engaging the nuclear state of North Korea through dialogue mechanisms This compilation of chapters by distinguished scholars explores Mongolia in the Northeast Asian geographical space within the context of three major themes nuclear proliferation environmental security and socio economic and civilisational conflicts The book provides a multidisciplinary and multinational approach to Mongolia's role in the region's strategic landscape It moves the regional security discussion beyond major power politics North Korea's denuclearisation and the impasse on the Korean Peninsula to discuss and analyse other underappreciated challenges facing the region Considering Mongolia's role in achieving peace and stability in the neighbourhood the book will be a valuable resource for researchers and readers in International Relations Political Science and Asian Studies

*Chinese Foreign Relations with Weak Peripheral States* Jeffrey Reeves, 2015-10-08 This book examines China's relations with its weak peripheral states through the theoretical lens of structural power and structural violence China's foreign policy concepts toward its weak neighbouring states such as the One Belt One Road

strategy are premised on the assumption that economic exchange and a commitment to common development are the most effective means of ensuring stability on its borders This book however argues that China's overreliance on economic exchange as the basis for its bilateral relations contains inherently self-defeating qualities that have contributed and can further contribute to instability and insecurity within China's periphery Unequal economic exchange between China and its weak neighbours results in Chinese influence over the state's domestic institutions what this book refers to as structural power Chinese structural power in turn can undermine the state's development contribute to social unrest and exacerbate existing state-society tensions what this book refers to as structural violence For China such outcomes lead to instability within its peripheral environment and raise its vulnerability to security threats stemming from nationalism separatism terrorism transnational organised crime and drug trafficking among others This book explores the causality between China's economically reliant foreign policy and insecurity in its weak peripheral states and considers the implications for China's security environment and foreign policy This book will be of much interest to students of Chinese politics Asian security studies international political economy and IR in general
