### Window Light Portraits

Opposite page: Dark, natural light on the side of the lighthouse in the morning, with all windows open to let in as much light as the opposite side.

10. Light is not always your enemy when the window blinds are open. When you're in the process of taking a portrait, the window is on the right, you can open your shades to reveal bright light from the opposite window on the left, creating a much more even lighting and better skin clarity.

11. For most window-light photos, "natural light" was taken at the side of your face with a camera that's oriented to the sun with the blinds drawn, so the sun follows you as you move. But for me, by taking the opposite side, the sun follows me as I move, and I can take a photo with the sun behind me, creating a much better shadow. Position your hands and the person you're taking the photo of to allow for a nice, smooth face that's either in a square or a square-ish shape, with the light from the window side.

12. This scene might sound like a new chapter from your childhood book, or even a nursery rhyme. After all, when people shooting a photo of their aging parents, it's natural to want to photograph the person looking out over the ocean that's been their life. But don't have your parents look like they're dying slowly, instead have them look at the ocean for the first few seconds, as that first shot of the ocean is the best.

*Tech Giants, Artificial Intelligence, and the Future of Journalism* Jason Paul

Whittaker, 2019-02-11 This book examines the impact of the Big Five technology companies Apple, Alphabet, Google, Amazon, Facebook and Microsoft on journalism and the media industries. It looks at the current role of algorithms and artificial intelligence in curating how we consume media and their increasing influence on the production of the news. Exploring the changes that the technology industry and automation have made in the past decade to the production, distribution and consumption of news globally, the book considers what happens to journalism once it is produced and enters the media ecosystems of the internet tech giants and the impact of social media and AI on such things as fake news in the post-truth age. The audience for this book are students and researchers working in the field of digital media and journalism studies or media studies more generally. It will also be useful to those who are looking for extended case studies of the role taken by tech giants such as Facebook and Google in the fake news scandal or the role of Jeff Bezos in transforming The Washington Post.
