Mark J. Rozell

Media Power:

Media Power David L. Altheide, 1985 Altheide deals with a very simple paradox in the past people communicated in order to get something done now they must first do something in order to communicate The role of the mass media in establishing shaping and maintaining basic communication formats is the main focus of his book He looks at how mass mediated versions of events differ from those experienced first hand and at what would happen if everyone had unlimited access to television broadcasting facilities Using specific examples and case studies of current events Altheide examines the impact and implications of the mass media on a range of phenomena from international relations down to self concept This book is an important complement to that whol

Media Power in Politics Doris Appel Graber, 1990 *Media Power in Hong Kong* Charles Chi-wai Cheung, 2016-02-12 Studies of Hong Kong media primarily examine whether China will crush Hong Kong s media freedom This book however traces the root problem of Hong Kong media back to the colonial era demonstrating that before the resumption of Chinese sovereignty there already existed a uniquely Hong Kong brand of hyper marketized and oligopolistic media system The system encouraged by the British colonial government was subsequently aggravated by the Chinese government This peculiar system is highly susceptible to state intervention and structurally disadvantaged dissent and marginal groups before and after 1997 The book stresses that this hyper marketized media system has been constantly challenged Through a historical study of media stigmatization of youth this book proposes that over the years various counter forces have penetrated the structurally lopsided Hong Kong media independent public popular and news media all make occasional subversive alliances to disrupt the mainstream and news media with a strong liberal professionalism provide the most subversive space for challenging cultural hegemony The book offers an alternative and fascinating account of the dynamics between hegemonic closure and day to day resistance in Hong Kong media in both the colonial and post colonial eras arguing that the Hong Kong case generates important insights for understanding ideological struggles in capitalist media

Media Power Ciaran McCullagh, Jo Campling, 2002 This text offers a clear and succinct overview of how much power the media have drawing together a wide range of theoretical and research based material from both sides of the Atlantic Written with a light touch and taking a level headed approach to competing theories and claims it is accessibly organized around the three central processes in mass communication production representation and reception and provides comprehensive coverage of all the main topics relevant to the thorny issue of media power

Media Power, Media Politics Mark J. Rozell, 2003 This work examines the role and influence of the media in every sphere of American politics Organized thematically the book analyzes the relationship between the media and key institutions political actors and nongovernmental entities as well as the role of the new media media ethics and foreign policy coverage Written by leading scholars in the field the chapters serve as broad overviews to the issues while discussion questions and suggestions for further reading encourage deeper inquiry Designed to complement a wide variety of classes the book is a look at the

pervasive influence of the media in American society Envisioning Media Power Brett Christophers, 2009-04-16

Envisioning Media Power develops an original geographical perspective on the nature and exercise of power in the international television economy. It uses theories of political economy as the basis for a comparative empirical examination of the UK and New Zealand television markets while closely considering these markets' respective relationships with the US market and its globally influential media corporations. In fleshing out this geographical perspective, the book critically addresses the power to produce, reproduce, and extract profit from territorialized media markets. To understand such powers, the book examines processes of creation and dissemination of industry knowledge, structures of industry governance, and the locational characteristics of television's operational economy. Through its rigorous and creative combination of conceptual insights with empirical substance, Envisioning Media Power both illuminates the fabric of television's international space economy and ultimately offers a unique theoretic argument suggesting that power, knowledge, and geography are inseparable, not only from one another but from the process of accumulation of media capital.

Contesting Media Power James Curran, Nick Couldry, 2003-09-22

Contesting Media Power is the most ambitious international collection to date on the worldwide growth of alternative media that are challenging the power concentration in large media corporations. Media scholars and political scientists develop a broad comparative framework for analyzing alternative media in Australia, Chile, China, Indonesia, Malaysia, Russia, Sweden, South Africa, the United Kingdom, and the United States. Topics include independent media centers, gay online networks, and alternative web discussion forums; feminist film; political journalism; and social networks; indigenous communication; and church-sponsored media. This important book will help shape debates on the media's role in current global struggles such as the anti-globalization movement.

The Place of Media Power Nick Couldry, 2002-01-04

This fascinating study focuses on an area neglected in previous studies of the media: the meetings between ordinary people and the media. Couldry explores what happens when people who normally consume the media witness media processes in action or even become the object of media attention themselves.

The Contradictions of Media Power Des Freedman, 2014-09-25

Media power is a crucial, although often taken for granted, concept. We assume, for example, that the media are powerful; if they were not, why would there be so many controversies over the regulation, control, and impact of communicative institutions and processes? Further, we assume that this power is somehow problematic: audiences are often treated as highly susceptible to media influence, and too much power in the hands of one organization or individual is seen as risky and potentially dangerous. These concerns have been at the heart of recent controversies involving the relationships between media moguls and political elites, the consequences of phone hacking in the UK, and the emerging influence of social media as vital gatekeepers. Yet it is still not clear what we mean by media power or how effective it is. This book evaluates contrasting definitions of media power and looks at the key sites in which power is negotiated, concentrated, and resisted politically, technologically, and economically. Combining an evaluation of both previous literature and new

research the book seeks to establish an understanding of media power which does justice to the complexities and contradictions of the contemporary social world It will be important reading for undergraduates postgraduates researchers and activists alike
