English language readers to Japan's rich body of theoretical and conceptual work on media for the first time. The essays address a wide range of topics including the work of foundational Japanese thinkers, Japanese theories of mediation and the philosophy of media, the connections between early Japanese television and consumer culture and architecture's intersection with communications theory. Tracing the theoretical frameworks and paradigms that stem from Japan's media ecology, the contributors decenter Eurocentric media theory and demonstrate the value of the Japanese context to reassessing the parameters and definition of media theory itself. Taken together, these interdisciplinary essays expand media theory to encompass philosophy, feminist critique, literary theory, marketing discourse, and art, providing a counterbalance to the persisting universalist impulse of media studies and emphasizing the need to consider media theory situationally.

Media/theory Shaun Moores, 2005. Media Theory is an accessible yet challenging guide to thinking about media and communications in modern life. Shaun Moores connects the analysis of media and communications with key themes in contemporary social theory: Time, Space, Relationships, Meanings, and Experiences. He insists that media studies are not simply about studying media. Rather, they require an understanding of how technologically mediated communication is bound up with wider processes in the modern world, from the reproduction of social life on an everyday basis to the reorganization of social relations on a global scale. Drawing on ideas from a range of disciplines in the humanities and social sciences, Media Theory makes a distinctive contribution towards rethinking the shape and direction of media studies today.

Materialist Media Theory Grant Bollmer, 2019-09-19. Our technologies rely on an ever-expanding infrastructure of wires, routers, servers, and hard drives, a proliferation of devices that reshape human interaction and experience prior to conscious knowledge. Understanding these technologies requires an approach that foregrounds media as an agent that collaborates in the production of the world, beyond content or representation. Materialist Media Theory provides an accessible, synthetic account of the cutting edge of the theoretical humanities, examining a range of approaches to media's physical infrastructural role in shaping culture, space, time, cognition, and life itself. More than a mere introduction, Materialist Media Theory provides a critical intervention into matter and media of interest to students and researchers in media studies, communication, cultural studies, visual culture, and beyond. Media determines our reality, and any politics of media must begin by foregrounding the media's materiality.
